

FOR DEVELOPERS

Old Firefly samples may call endpoints that are gone

REMOVED
Oct 3, 2025

~~POST /v3/images/generate~~

POST /v3/images/generate-async

async is the only way now

1 What Adobe changed

From the Firefly API changelog.

Nov 18, 2024

Async APIs generally available

Mar 11, 2025

Custom models arrive in Generate Images

Apr 29, 2025

Image Model 4 available in the API

Sep 10, 2025

Generate Images v2, Expand and Fill v1 removed

Oct 3, 2025

Non-async v3 Generate, Similar, Composite, Expand, Fill removed

2 Submit, poll, download

Every image job follows the same loop.

running

succeeded

or

failed

The statuses in Adobe's own polling sample.

3 Model 4 lives in a header

Not in the JSON body. The path stays on /v3/.

request

```
POST /v3/images/generate-async
x-model-version: image4_standard
x-api-key: <client id>
Authorization: Bearer <token>
```

gateway picks the model

image3

the default

image3_custom

custom model

image4_standard

Model 4

image4_ultra

Model 4 Ultra

image4_custom

custom model

Values from the v3 OpenAPI spec.

Sources in the first comment

4 Image5 has a new schema

Not backward compatible. Old payloads get rejected.

Removed

- ✗ `aspectRatio`
- ✗ `modelVersion`
- ✗ `output.cai`
- ✗ `output.storeInputs`

Now in play

- ✓ `negativePrompt`
- ✓ `contentClass`
- ✓ `upsamplerType`
- ✓ `visualIntensity`
- ✓ `promptBiasingLocaleCode`

4 MP native

Adobe's Image5 pages differ in details. Check the current reference before you port.

5 Test Ultra's limit, don't assume it

What your UI expects

```
"numVariations": 4
```

What Ultra might return

In the Firefly web app, Ultra gives one image (Adobe Community). For the API, test numVariations yourself.

Polling loop or job orchestrator?

Answer in the comments. I read every one.

Polling loop

Step Functions

Temporal

Something else

Next: the four knobs that make Firefly output repeatable.
