

IT teams: the new hire can't open GenStudio

Org membership isn't access

1

Membership is not access

Being in the IMS org proves who you are. It doesn't grant what you can use.

2

Product profile required

GenStudio access comes from a product profile with role-based entitlements.

3

Use groups

Link user groups to the profile.

Overnight sync won't invent access for you.

4

Fix it in Admin Console

Permissions aren't configured only inside GenStudio. Admin Console settings apply.

4

DIAGRAM

How access reaches GenStudio, and agents

Agents and MCP servers act as the signed-in user. They reach only what the user's product profile allows.

ADOBE TOOLS TO KNOW

Adobe MCP servers (OAuth via IMS)

DOCUMENTED

Workfront MCP server

DOCUMENTED

Product profiles in Admin Console

DOCUMENTED

Status as of Sept 2026. Confirm in your own tenant.

BEST PRACTICES

Add agent access to onboarding acceptance checks.

Provision through groups linked to product profiles.

On failure, check the selected IMS org first.

ADOBE DOCS

Enable Workfront MCP and confirm region before rollout.

ADOBE DOCS

Untagged items are design advice.
