

Workfront users: your Workflow is doing two jobs

Split strategy from execution

1

The symptom

Poor campaign visibility, inconsistent reports and a shadow spreadsheet for schedules.

2

Planning owns strategy

Campaign briefs, calendars and cross-BU visibility live in Workfront Planning.

3

Workflow owns execution

Tasks, predecessors, resources, agency work and status.

3

4

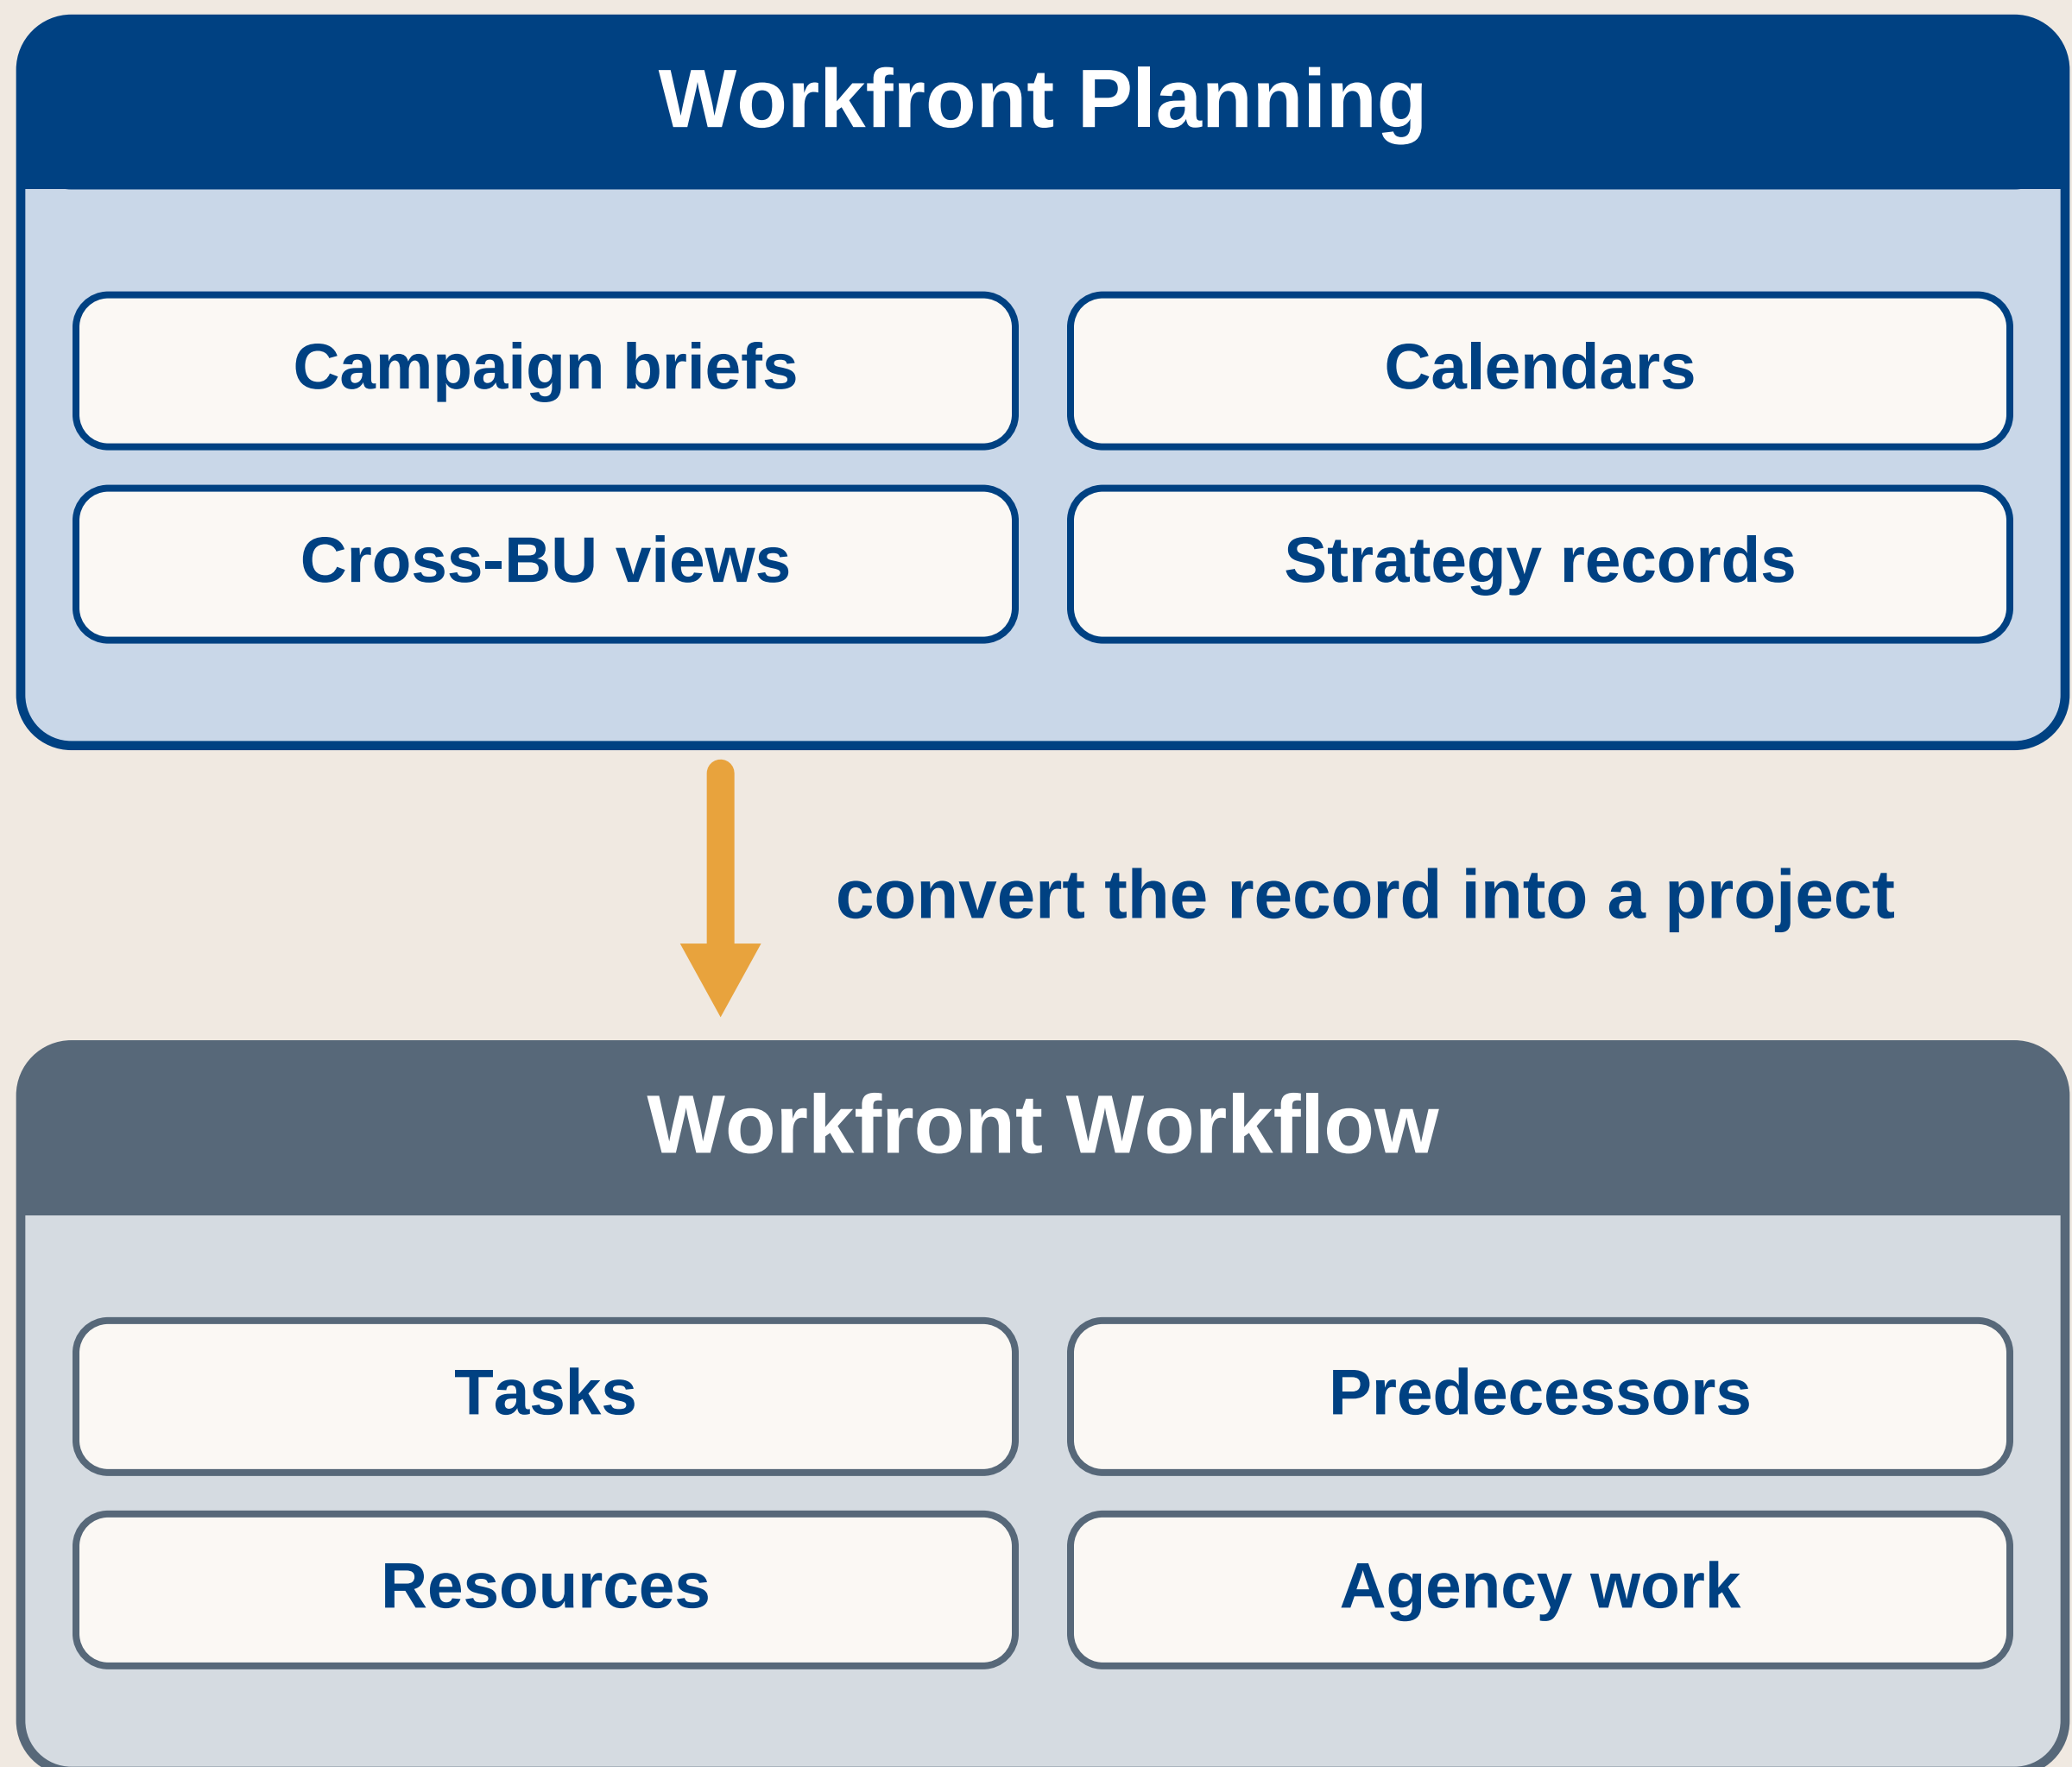

Don't rebuild

Add Planning and slim Workflow down. More complexity in the wrong layer won't help.

4

DIAGRAM

**Planning owns strategy.
Workflow owns execution.**

Planning agents turn goals into plans and projects. Point them at Planning for strategy and Workflow for execution.

ROADMAP

Status as of Sept 2026. Confirm in your own tenant.

BEST PRACTICES

Keep strategy in Planning; give agents execution structures in Workflow.

Define approved templates agents may instantiate.

ADOBE DOCS

Retire the shadow spreadsheet first.

Untagged items are design advice.
