

Marketing ops: type it once

Carry Planning metadata into Workflow

1

The problem

Briefs move to production and teams re-collect audience, campaign ID, market and channel.

2

Fix 1: convert records

Automate Planning campaign records into Workflow programs or projects, metadata carried forward.

3

Fix 2: pre-populated forms

Workflow custom forms fill from the originating Planning record.

4

Skip these

A dropdown that only references the record. A shared spreadsheet as the go-between.

DIAGRAM

Enter it once, let it travel

Let agents draft tasks from a brief. Keep required metadata on deterministic record conversion.

ADOBE TOOLS TO KNOW

Workflow Optimization Agent

ANNOUNCED

Workfront MCP server

DOCUMENTED

Fusion MCP Agent module

RELEASED

Status as of Sept 2026. Confirm in your own tenant.

BEST PRACTICES

Keep required metadata on deterministic paths.

Validate agent-created records against controlled values.

Use agents for judgment: brief to task descriptions.

Untagged items are design advice.
