

Reporting owners: free text breaks your reports

Structure metadata before you report

1

The symptom

Leadership reports come out incomplete, however you filter them.

2

The cause

Campaign names, channels and BUs typed as free-form text.

3

The fix

Controlled vocabularies on record types, so fields flow across connected records.

4

Master data too

ERP and PIM stay the product master.
Fusion writes attributes into Workfront
so nobody re-keys.

4

DIAGRAM

From free text to one controlled value

Paid Social

paid-social

PS

paid social

Controlled list

Paid Social

Paid Social

Paid Social

Paid Social

one value, one clean count

Natural-language queries are only as reliable as your field values. 'Paid Social' and 'paid-social' split agent answers too.

ADOBE TOOLS TO KNOW

Workfront MCP server

Fusion MCP Agent module

RELEASED

Status as of Sept 2026. Confirm in your own tenant.

BEST PRACTICES

Fix vocabularies at the schema before natural-language access.

Keep ERP and PIM as master; write fields with Fusion.

Spot-check agent answers against a standard report.

Untagged items are design advice.
