

Content ops: attach the asset, don't upload it again

AEM Assets as the source of truth

1

One approved home

Approved brand content lives in AEM Assets.

2

Attach in context

Workfront users use Asset Selector or Content Advisor instead of uploading a second copy.

3

Clearance is a status

Legally cleared means governed AEM status, not an email or a shared drive.

3

4

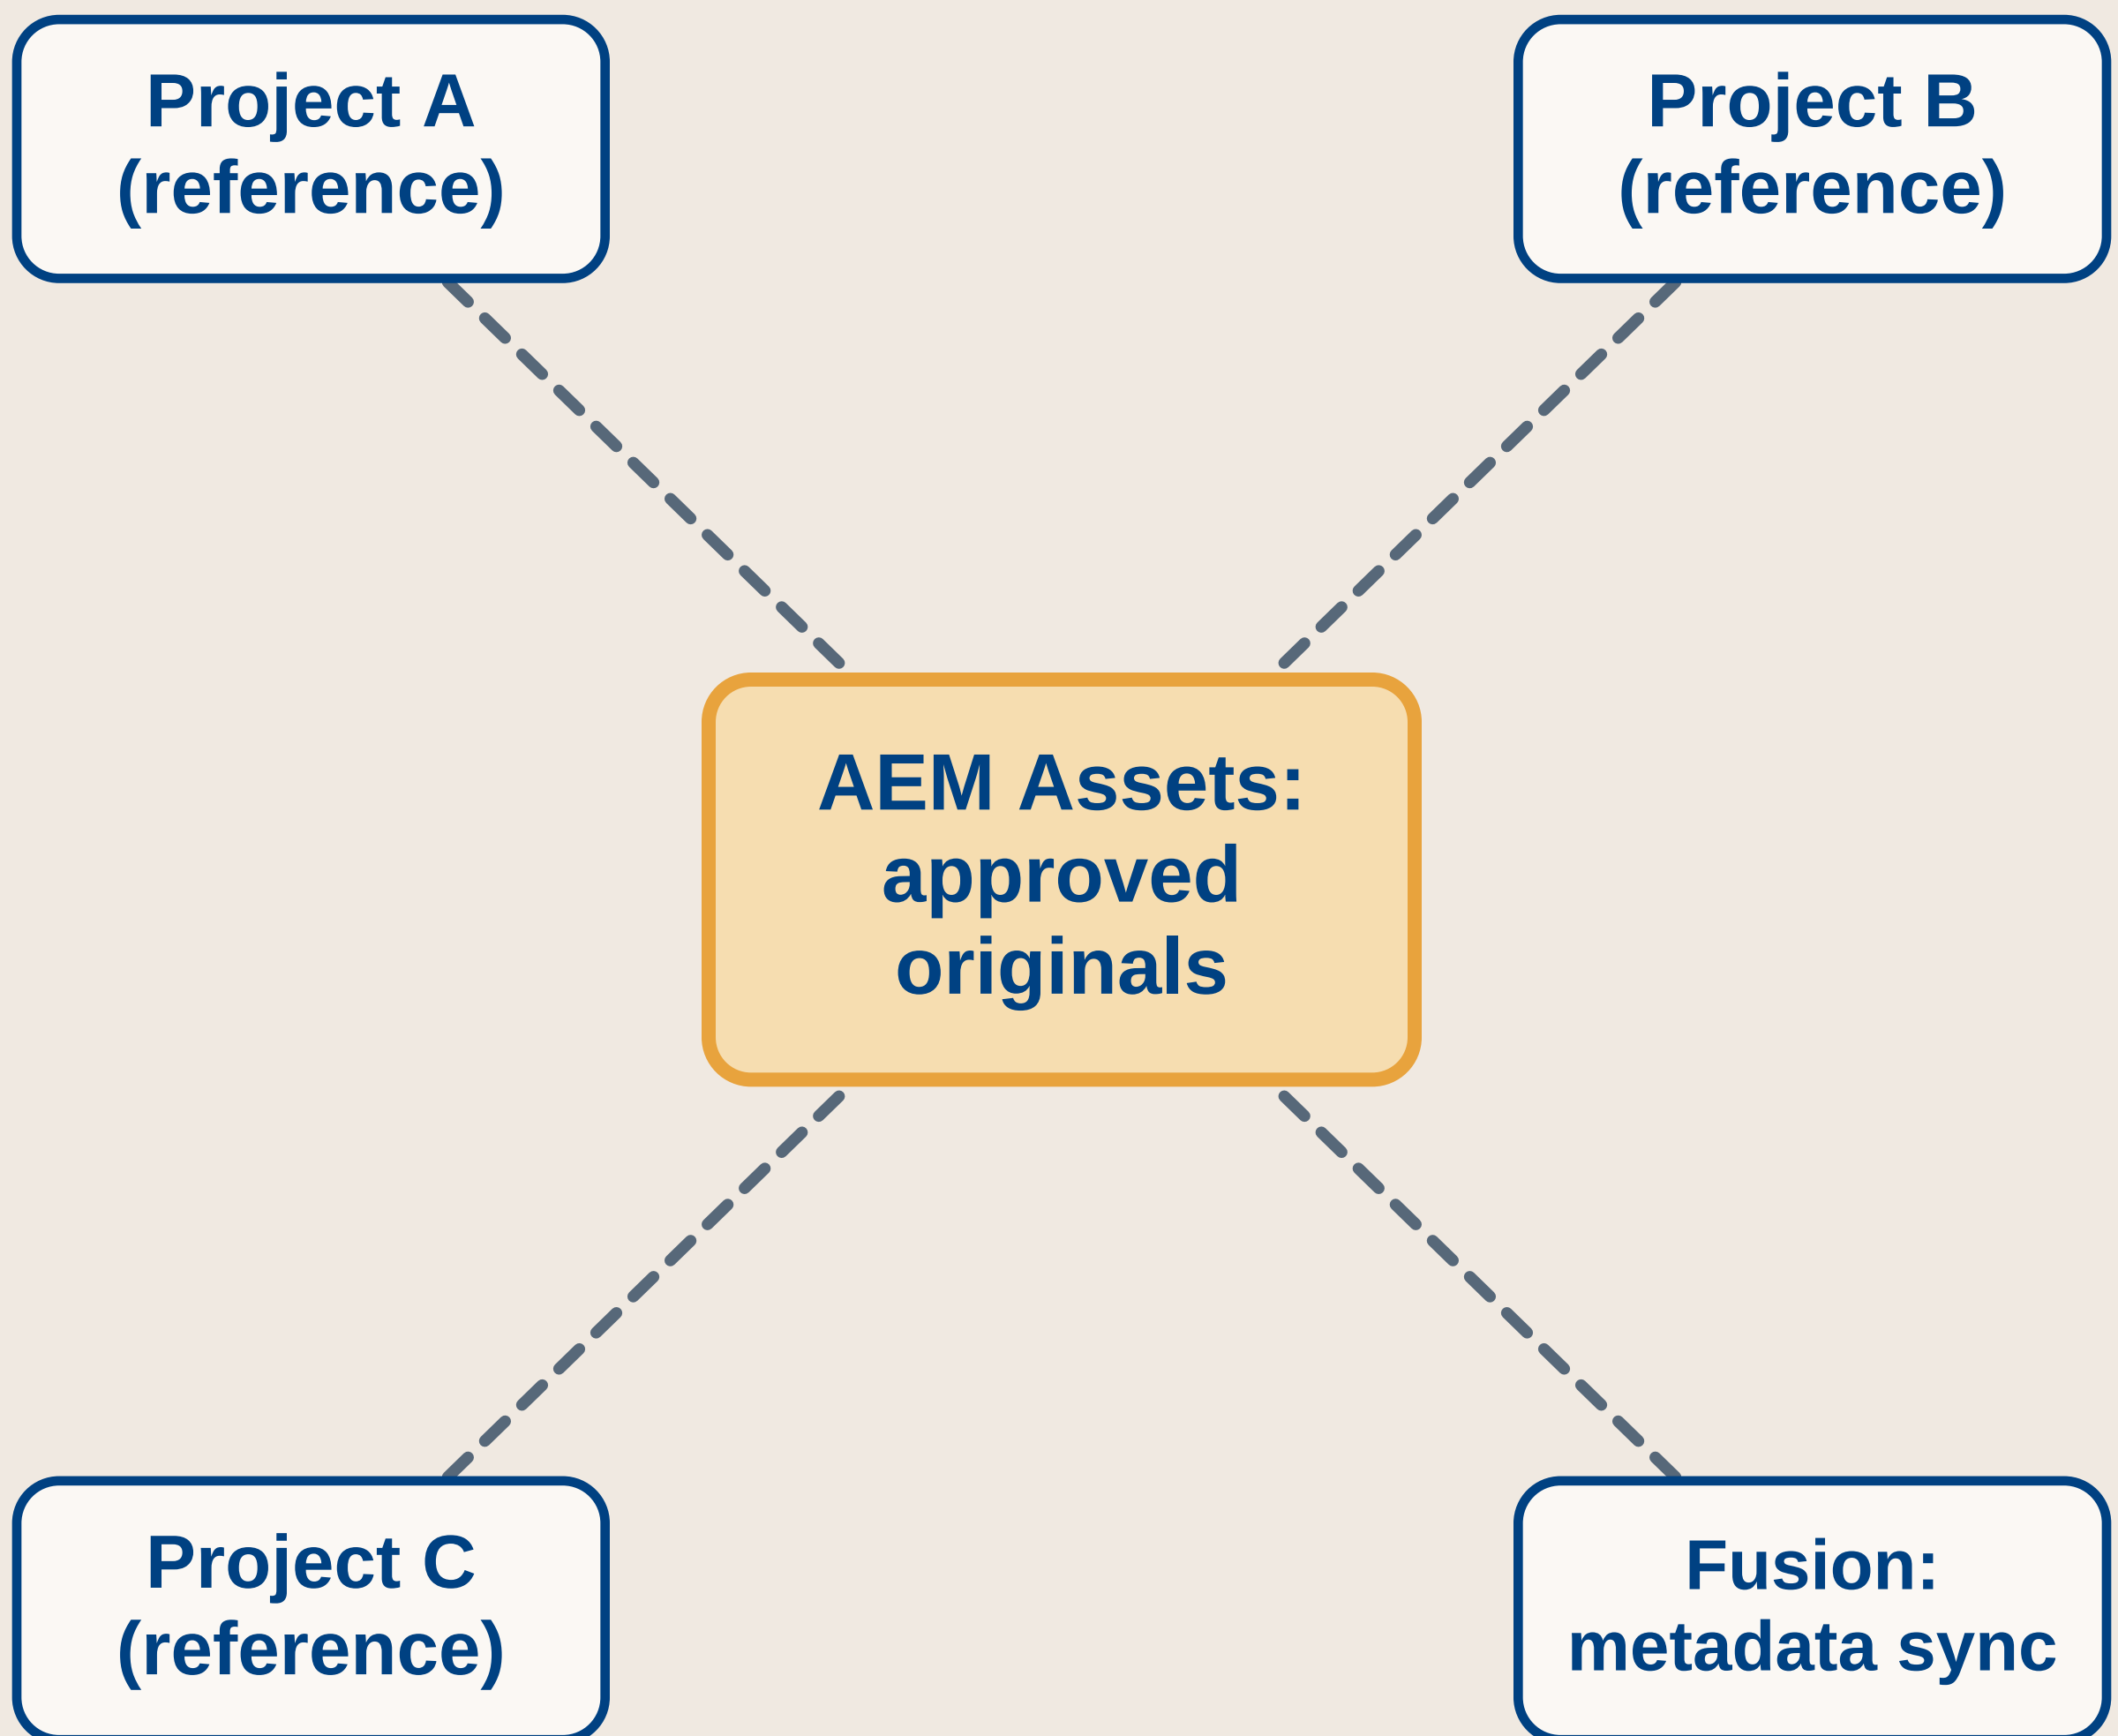

Metadata that travels

Use the native Workfront to AEM connector so metadata stays consistent.

4

DIAGRAM

Reference the approved asset

Content Advisor Agent finds approved assets in AEM. Have agents return references, never copies.

ADOBE TOOLS TO KNOW

Content Advisor Agent

DOCUMENTED

AEM Content MCP (read-only option)

DOCUMENTED

Brand Governance Agent

DOCUMENTED

Fusion AEM MCP connector

RELEASED

Status as of Sept 2026. Confirm in your own tenant.

BEST PRACTICES

Use the read-only endpoint for search-and-reuse agents.

ADOBE DOCS

Require the AEM reference and approval status back.

Let asset status gate reuse, not memory.

Untagged items are design advice.

Research dated 2026-09-23. Verify status in your tenant.

How many copies of your logo pack exist?

Be honest, in the comments.
