

DAM owners: a unified view without a migration

Federate and reference. Don't copy.

1

Several AEM instances

Approved, archive and regional stores can stay where they are.

2

Federate

AEM federated asset management connects them and presents one view.

3

Not Fusion copies

Copying binaries is a migration pattern with hidden duplicates.

3

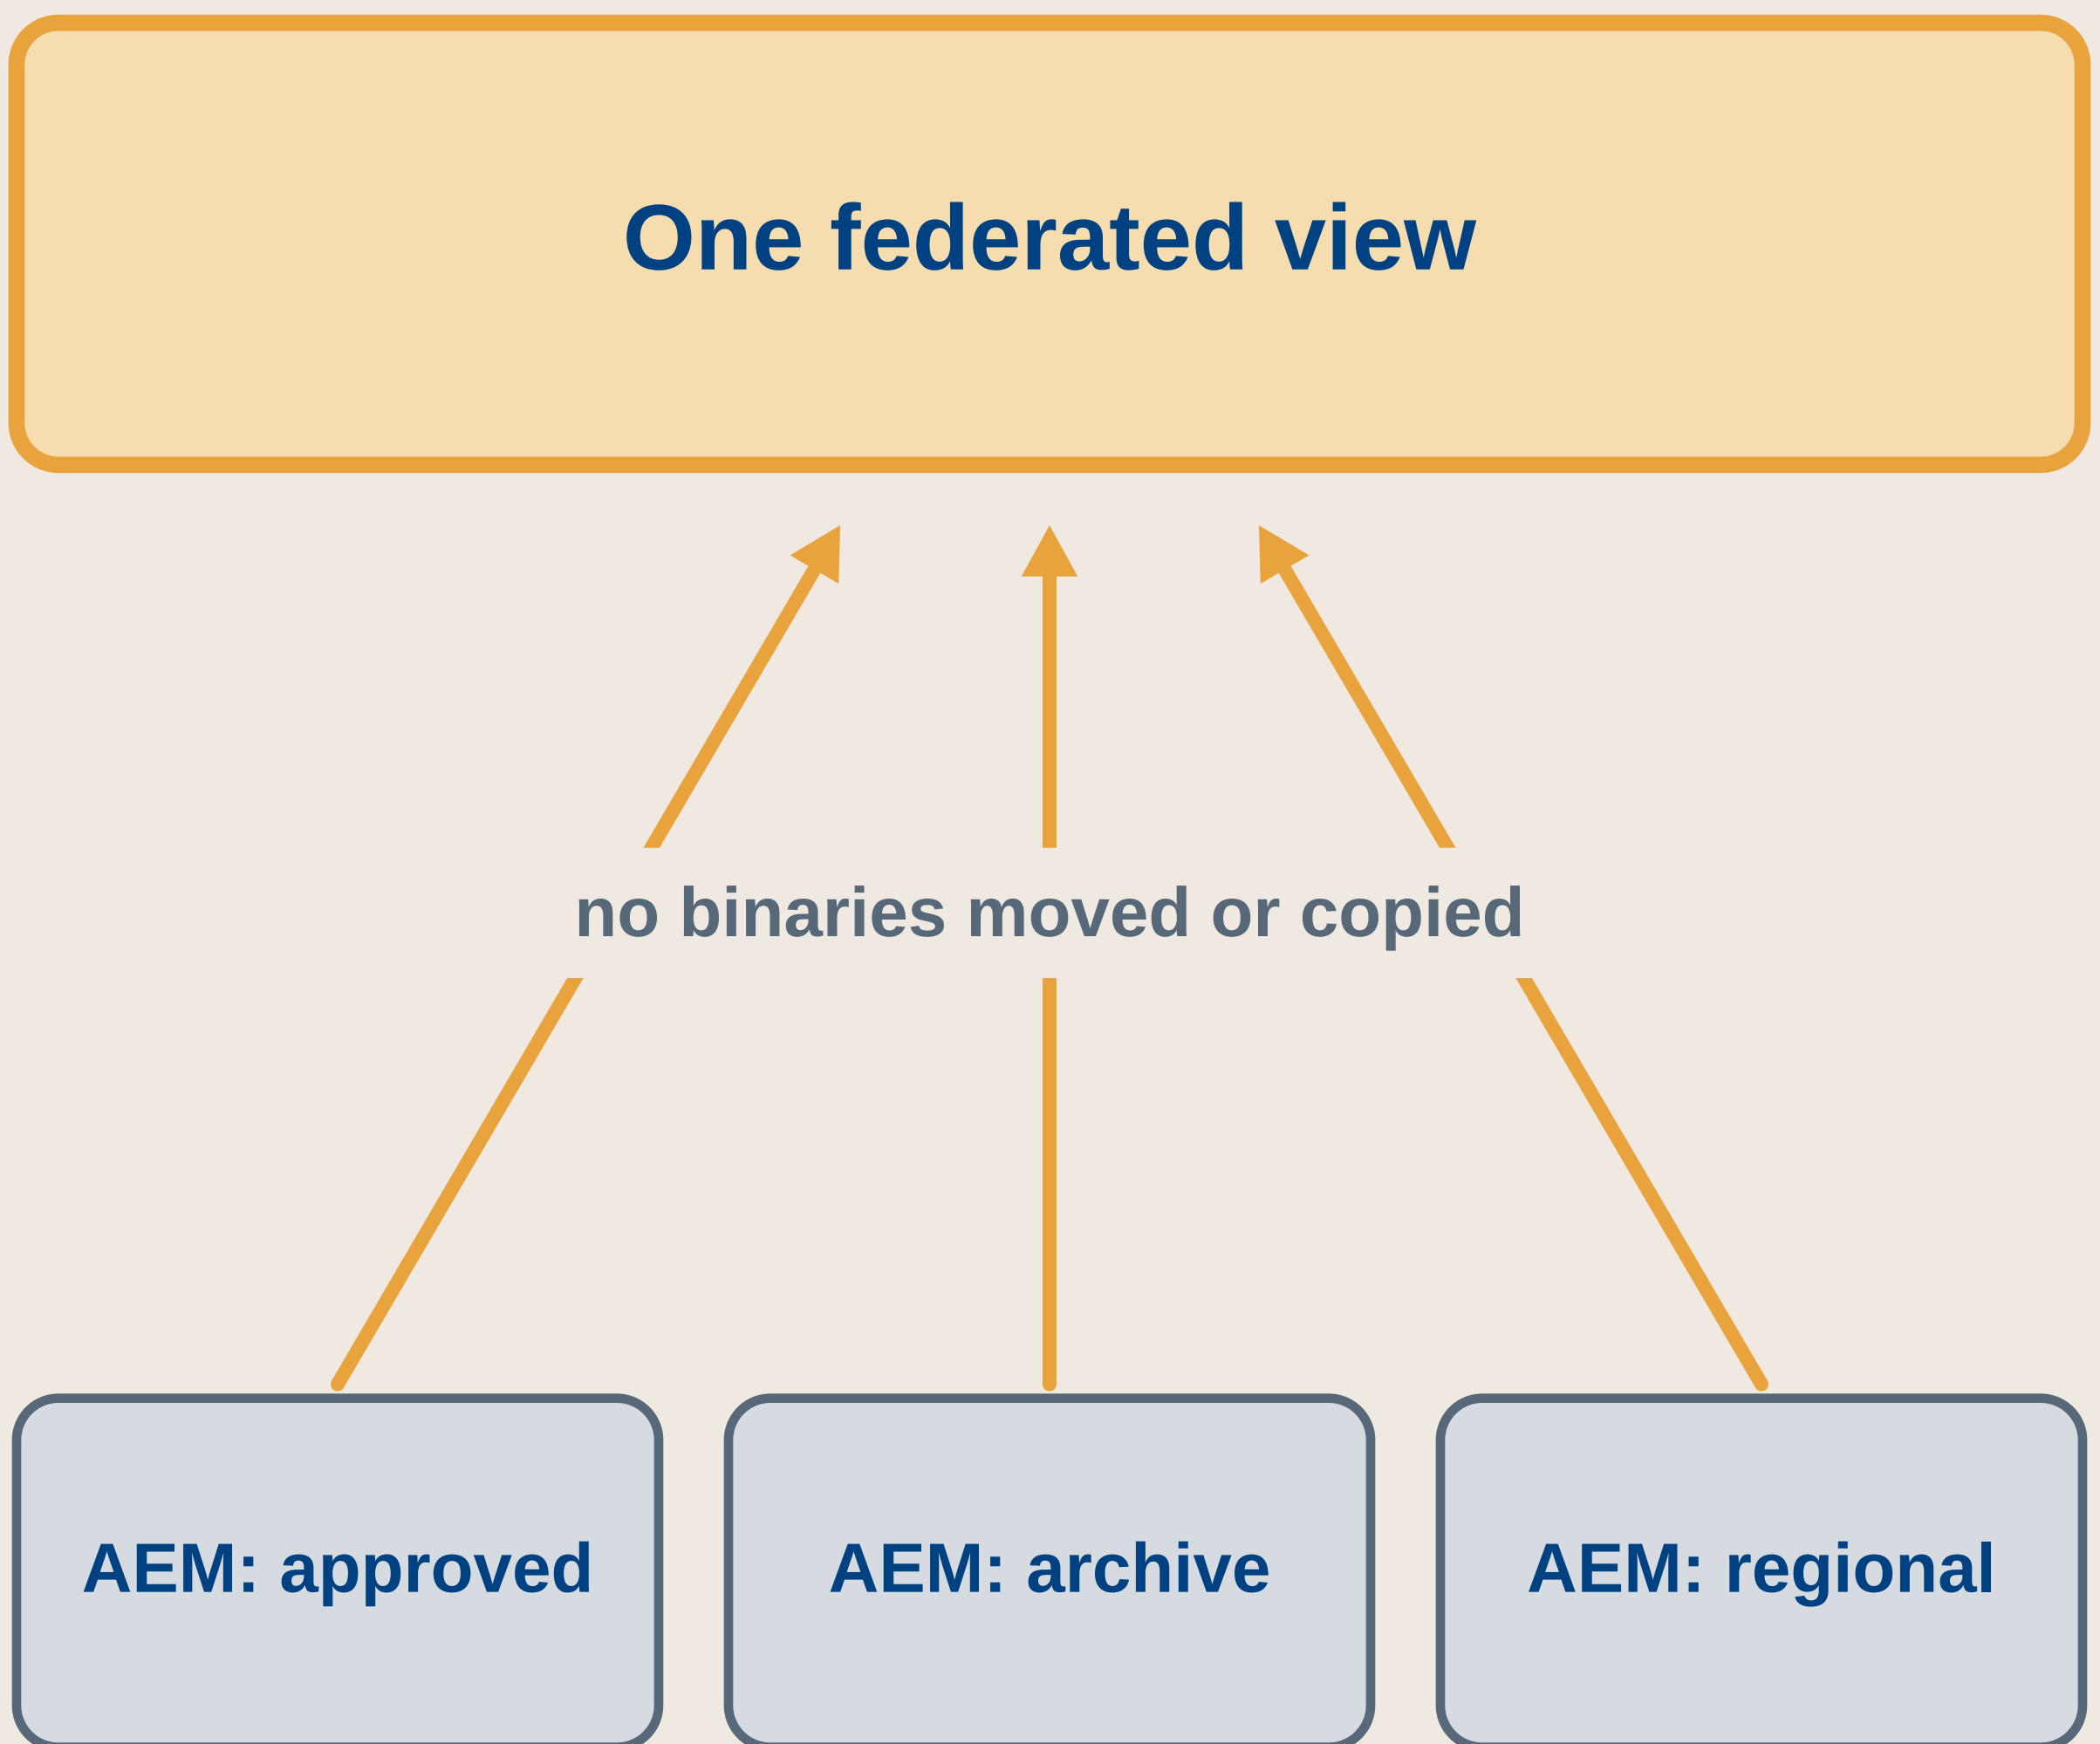

4

External DAM?

Show a reference connection in GenStudio with App Builder. Don't ingest a second master.

4

Federate: one view, nothing moved

Agent search follows the repositories it can reach. Test federated coverage before promising one conversational view.

ADOBE TOOLS TO KNOW

DOCUMENTED

Agent Composer (BYO agent)

VERIFY

Status as of Sept 2026. Confirm in your own tenant.

BEST PRACTICES

Test agent search on each federated repository.

Prefer reference connections over copies.

Document which repositories each agent can search.

Untagged items are design advice.
