

Creative ops: in-flight vs approved

ESM and AEM do different jobs

1

In-flight: ESM

One home for work in progress across Workfront, Frame.io and Creative Cloud.

2

Approved: AEM

Searchable, rights-managed,
governed assets live in AEM Assets.

3

Graduate, don't dump

Approved work moves into AEM.
Drafts don't.

3

4

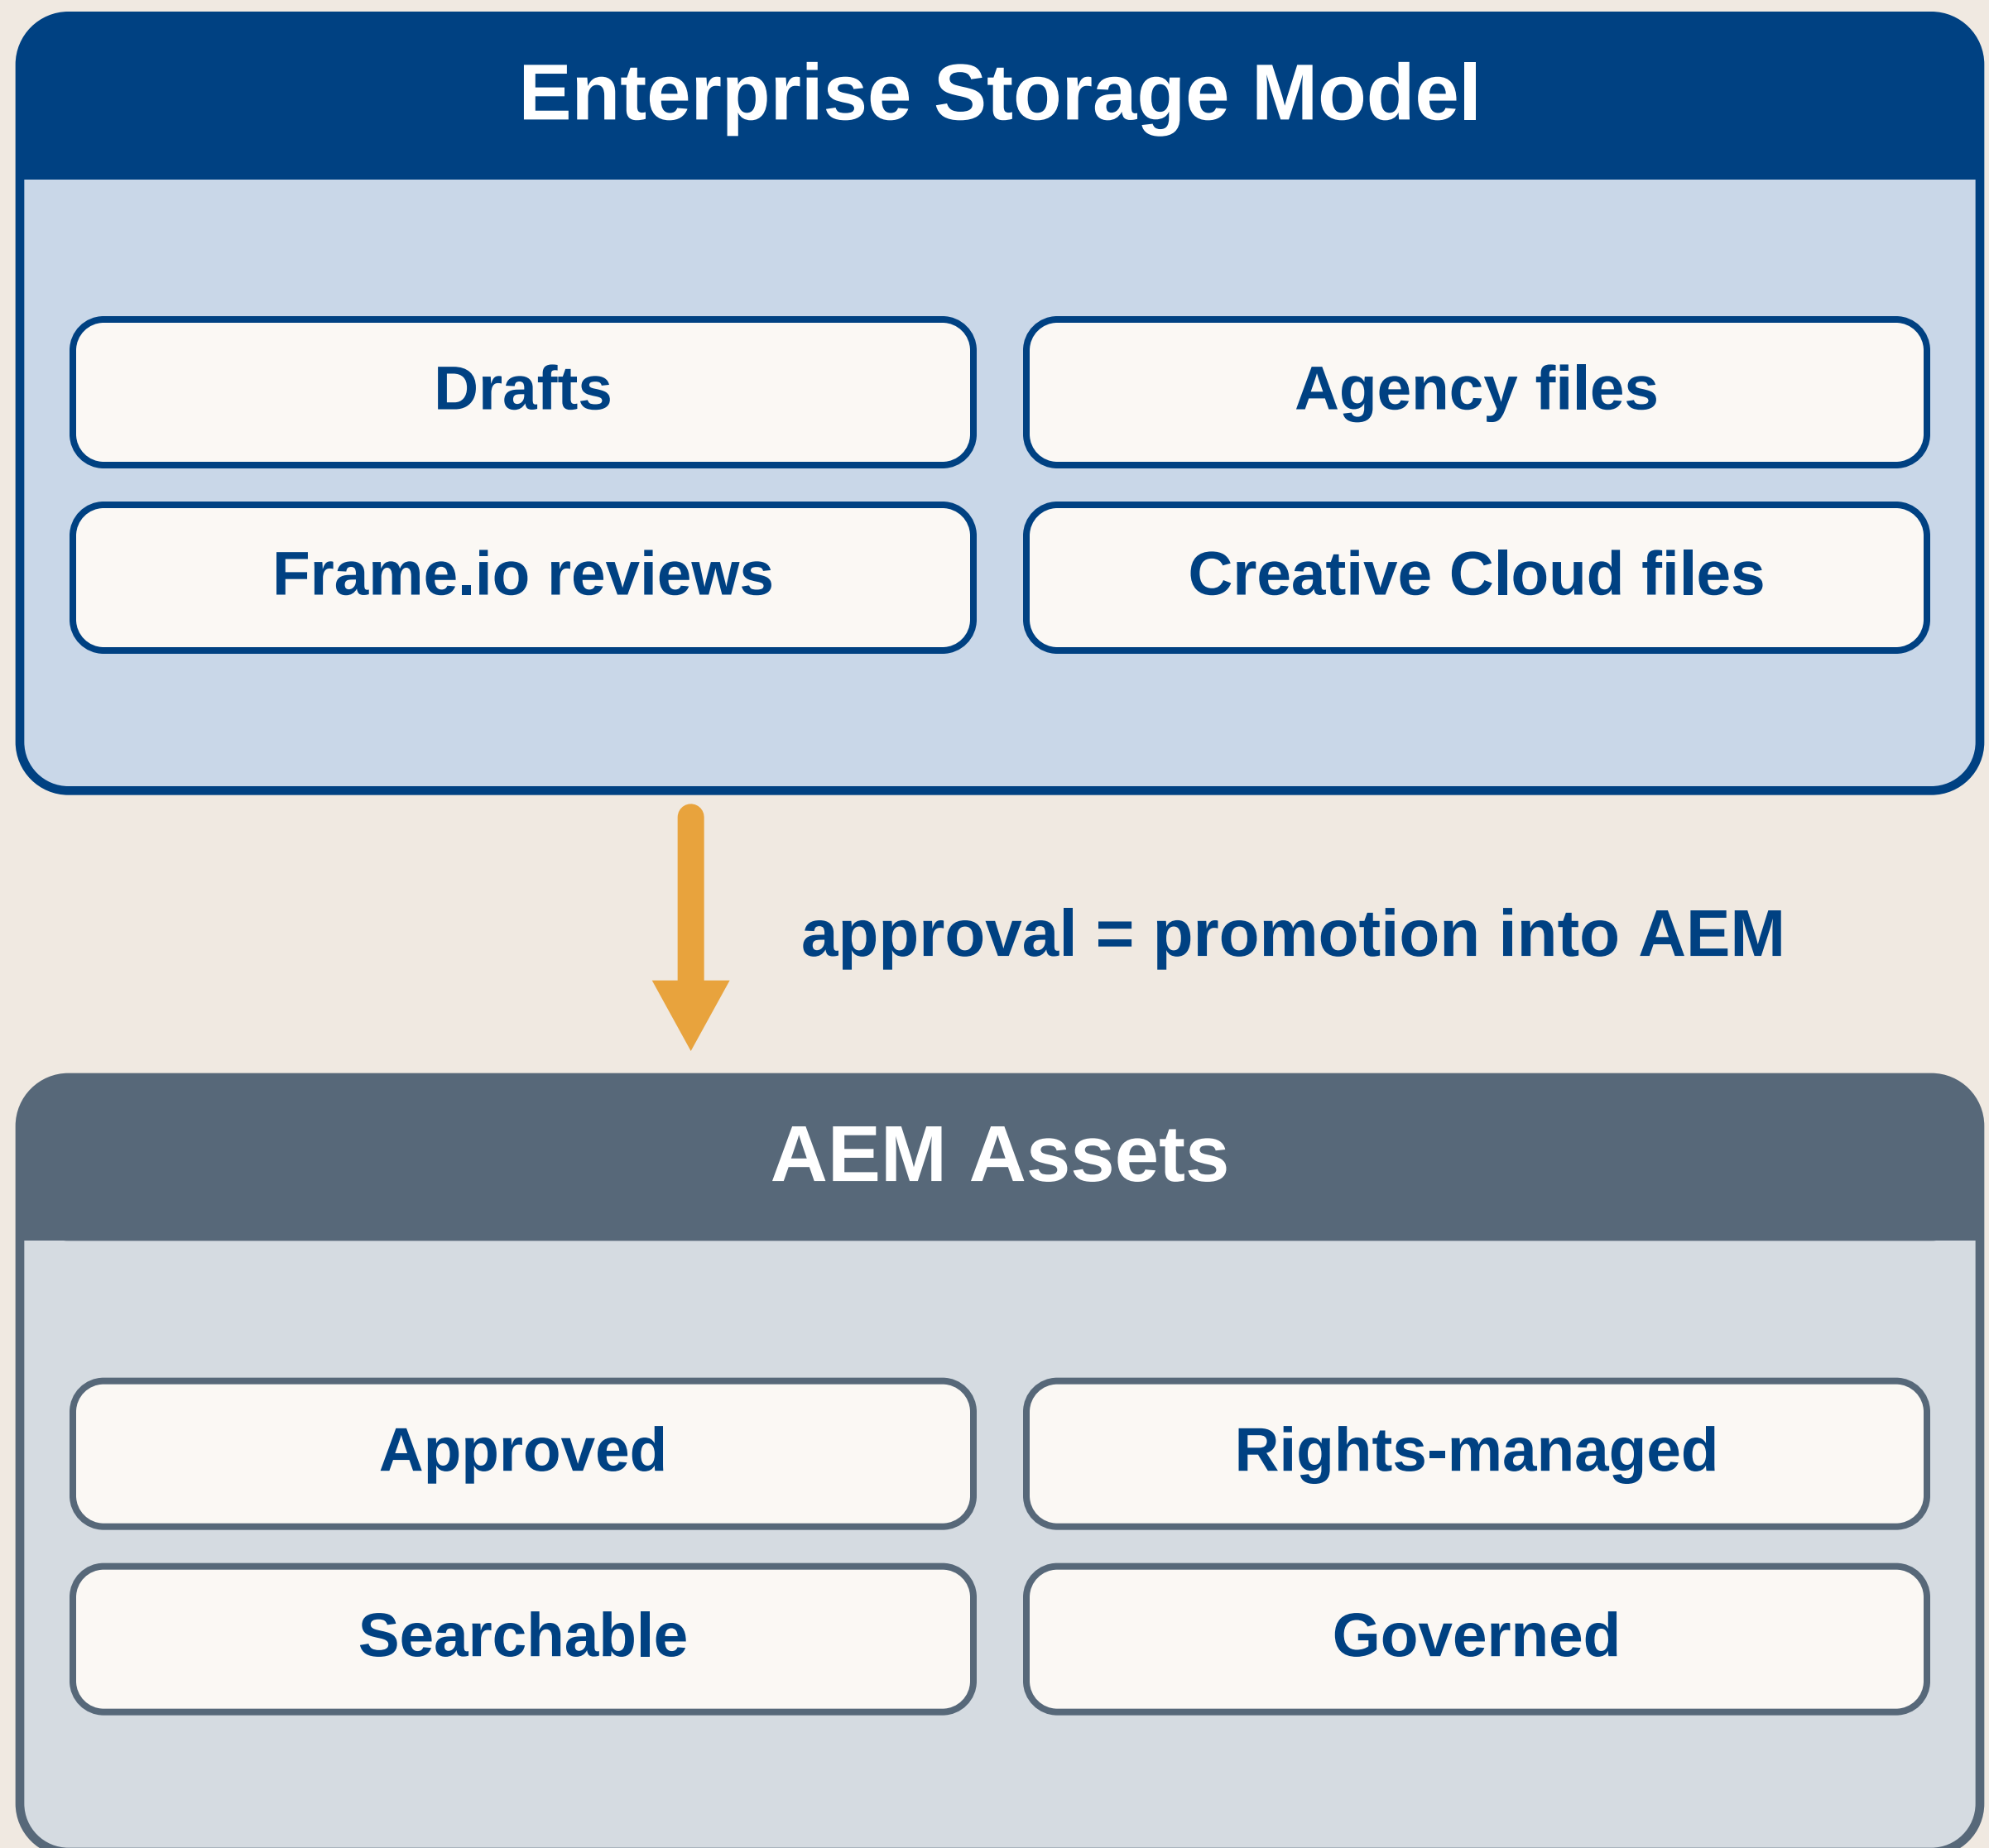

Diagnose it

WIP outside the platform? Enable ESM. Approved assets outside AEM? That's a DAM problem.

4

DIAGRAM

Work in progress vs approved

Use different agents for drafts and approved content. Promotion into AEM makes an asset discoverable for reuse.

ADOBE TOOLS TO KNOW

Frame.io natural-language search

RELEASED

BETA

Content Advisor Agent

DOCUMENTED

Status as of Sept 2026. Confirm in your own tenant.

BEST PRACTICES

Scope reuse agents to approved AEM content.

Use in-flight search only within the project team.

Promote with a status agents can filter on.

Untagged items are design advice.
