

GenStudio is one loop, not the whole chain

Scope check before you write a line of code.

the loop

the rest of the chain

not covered by one app

1 One loop, well defined

GenStudio for Performance Marketing:

Create

interprets briefs and produces channel content

agent-assisted

Activate

to paid destinations such as Meta and LinkedIn

native

Learn

performance returns to GenStudio Insights

connectors

Scope

which layers are in, which are out, who owns each

write it down

Not its job

Campaign planning, a governed DAM, cross-team review, owned journeys, asset-level analytics.

2 Match each layer to its owner

Before build starts, name the system of record.

3 Scope check before build

Three steps, on paper, before code.

List the layers in the chain

planning through measurement

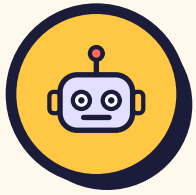

Mark each in scope or out

the loop you are implementing

Name a system of record

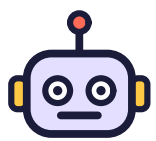

one owner per data type

Agentic angle

Agents live inside specific products and follow their permissions. No single agent covers planning, DAM and measurement for you.

ADOBE TOOLS TO KNOW

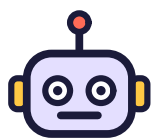

Content Production Agent (GSPM)

BETA

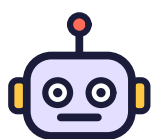

GenStudio for Perf. Marketing MCP

Best practices

Map each agent to one layer, and list the layers no agent covers.

Treat a product boundary as a scope boundary in your statement of work.

Confirm licensing first: agent jobs consume AI credits.
