

Federate your DAMs, don't migrate them

One view. Nothing moved.

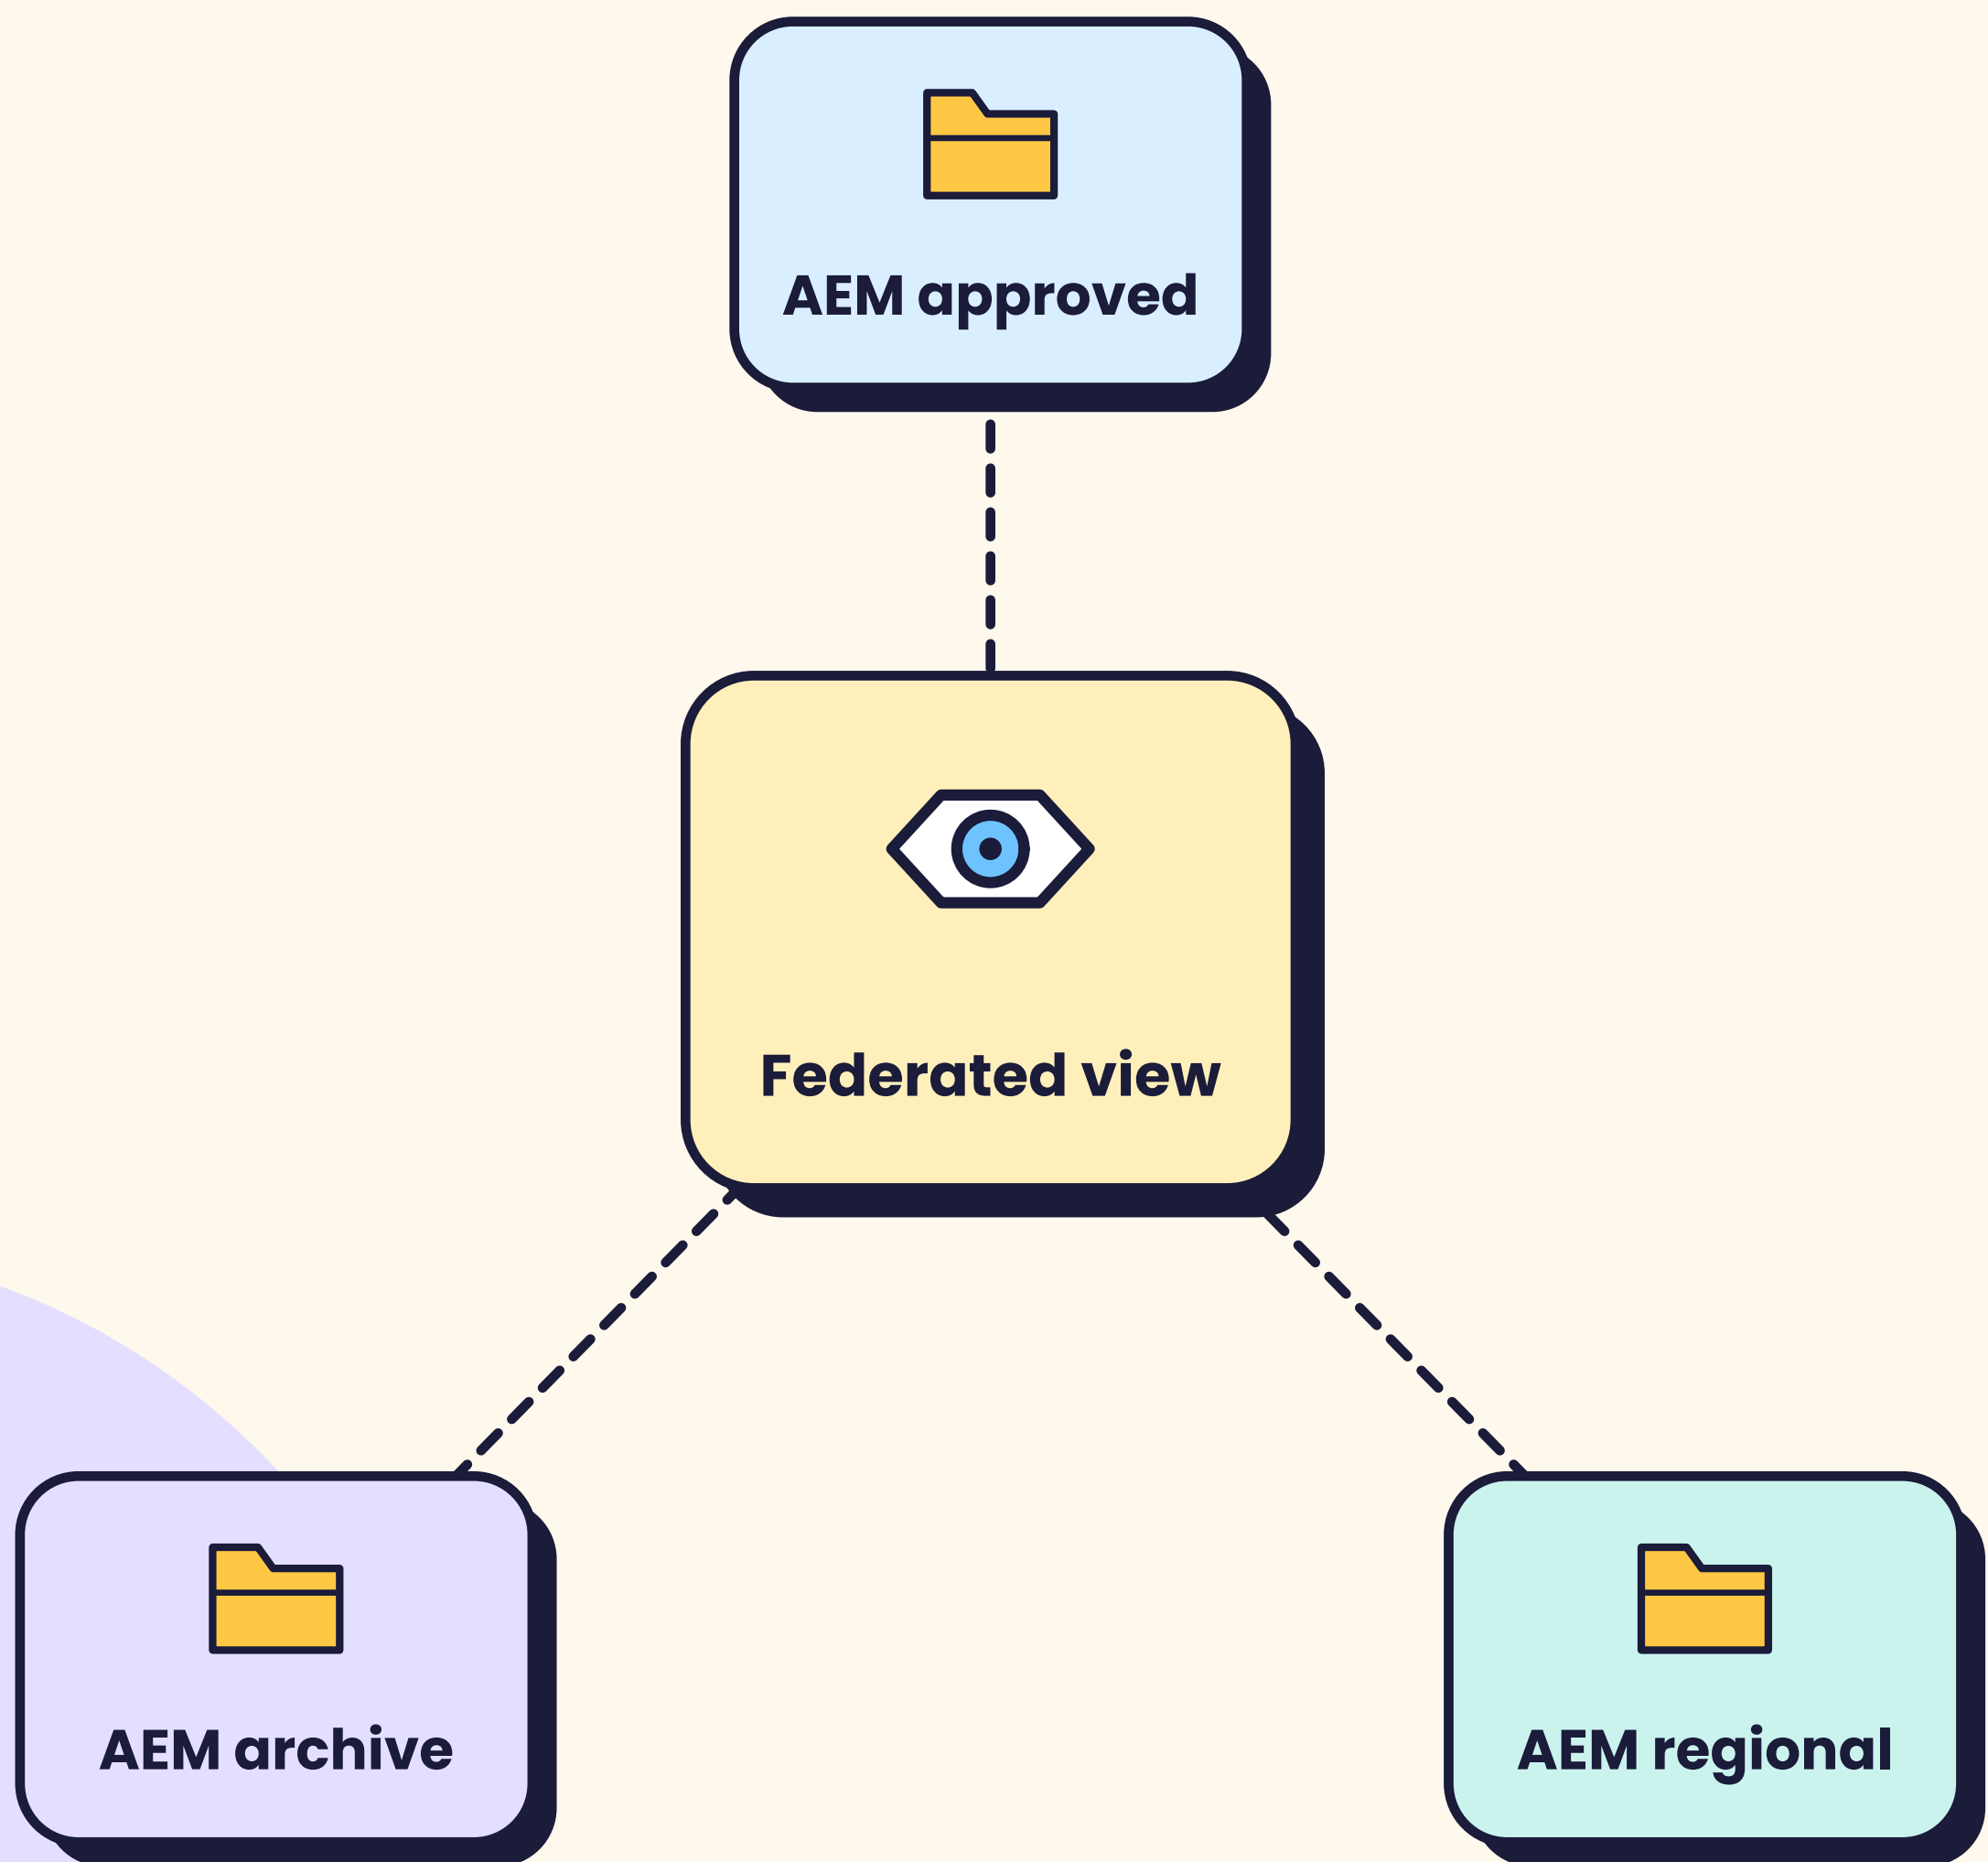

federation

no binaries copied

1 One view over several repositories

AEM federated asset management.

2 Federation vs a copy job

Same request, very different result.

Fusion copies binaries

A copy or migration pattern

Duplicate masters

A hidden project

Drift over time

AEM federation

Connects secondary repositories

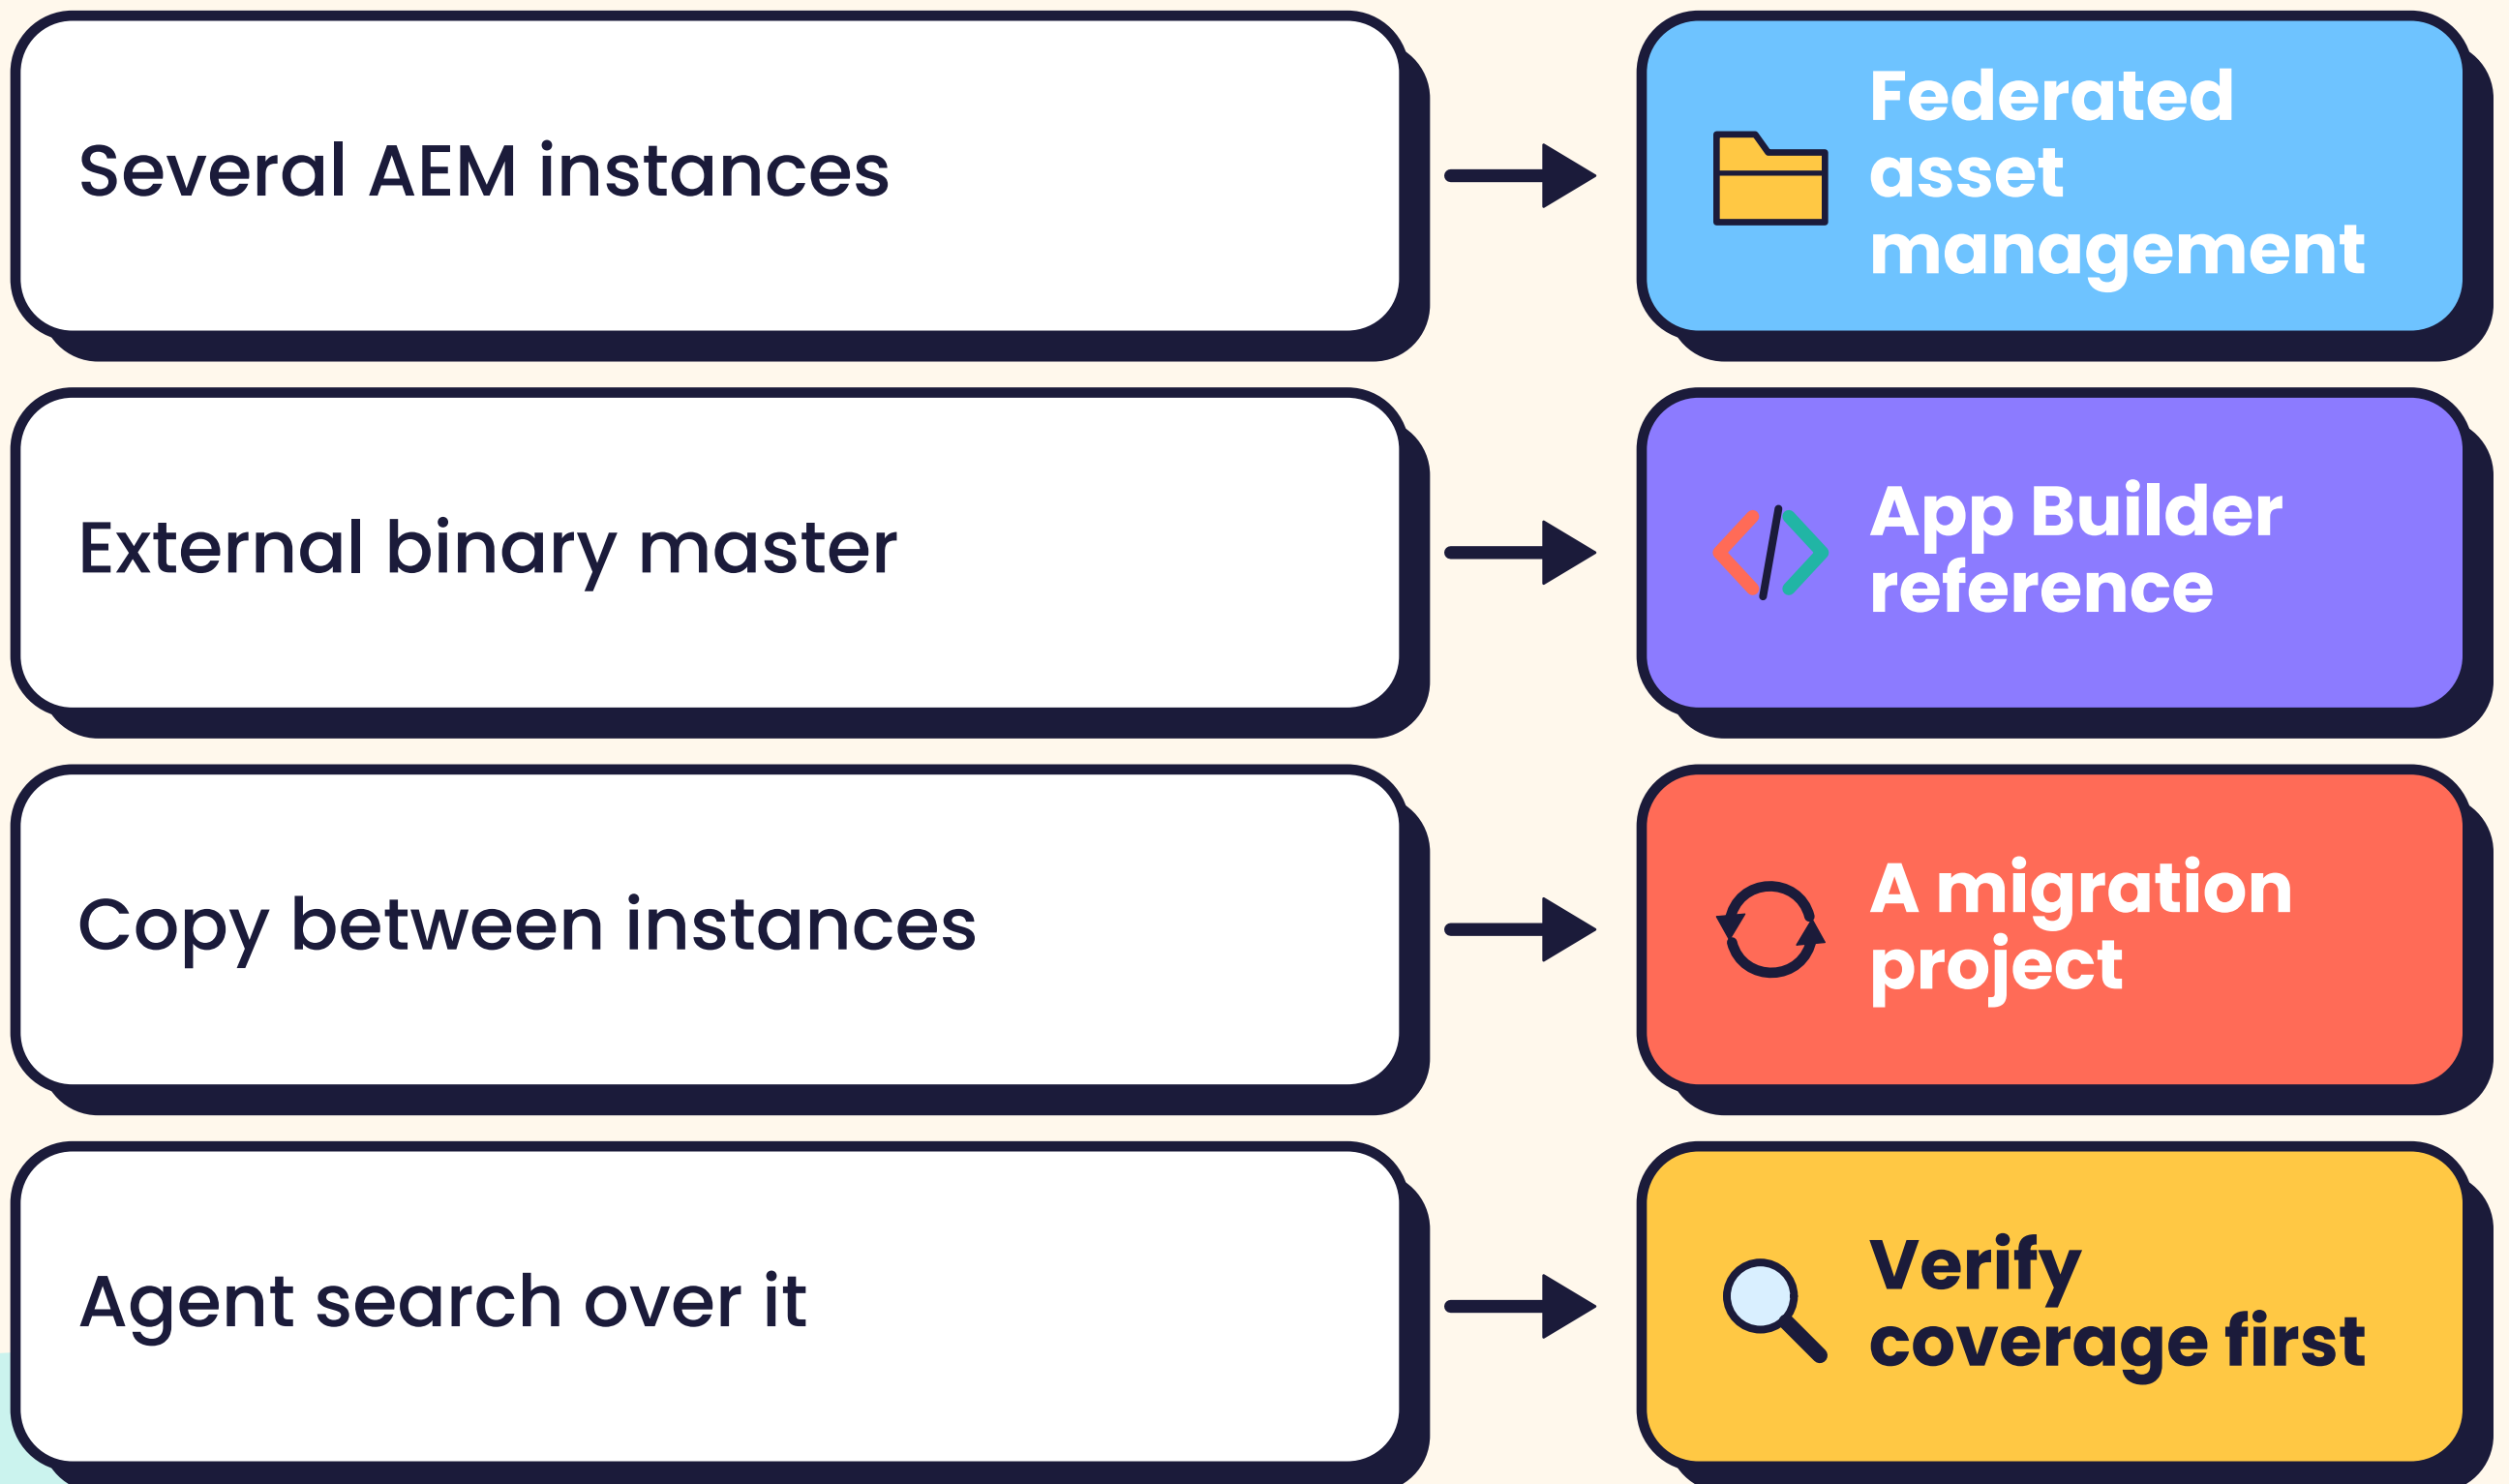

Unified view on top

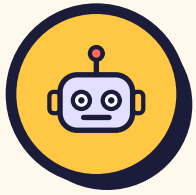

Nothing relocated

Assets stay put

3 Which tool for which requirement

Solve the view before the storage.

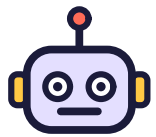

Agentic angle

Agent search follows the repositories it can reach. Test federated coverage before promising one conversational view.

ADOBE TOOLS TO KNOW

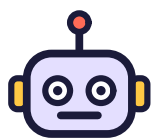

Content Advisor Agent

DOCUMENTED

AEM Content MCP servers

DOCUMENTED

Agent Composer (BYO agent)

VERIFY

Best practices

Test agent search on each federated repository.

Prefer reference connections over copies.

Document which repositories each agent can search.
