

In-flight vs approved

ESM and AEM do different jobs.

work in progress

approval = promotion

a lifecycle event

1 Two storage concerns, two systems

The boundary is a lifecycle event.

2 Diagnose the gap

Which system is missing?

3 Different agents for each side

Point reuse at approved content only.

promotion sets the filter

discoverable

Agentic angle

Use different agents for drafts and approved content. Promotion into AEM makes an asset discoverable for reuse.

Sources on slide 7

Best practices

Scope reuse agents to approved AEM content.

Use in-flight search only within the project team.

Promote with a status agents can filter on.
