

Which asset drove the outcome?

It starts with a durable ID.

primary key

generated once, immutable

1 One ID, brief to result

The same key in every system.

Planning: asset ID and metadata

created once

AEM: the same asset ID

no rename, no re-upload

Activation: the same asset ID

campaign and channel travel with it

Analytics: join on the ID

CJA and Content Analytics

2 Who answers what

Split by question.

GenStudio Insights

paid-media creative performance

in GSPM

Content Analytics + CJA

exposure tied to journeys and outcomes

asset-level

Data Insights Agent

questions and Workspace charts

in CJA

LLM Optimization

brand presence in AI answers

AI-first app

3 Rename, re-upload, lose the join

No analytics product stitches it back.

The ID changes en route

Renamed in the DAM

Re-uploaded to the ad platform

A different name per system

Agent answers are partial

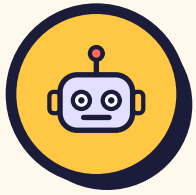

A durable ID

Generated once

Immutable

Passed to every system

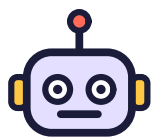

Agents can join on it

Agentic angle

Data Insights Agent and the CJA MCP answer 'which asset drove this?' only if the asset ID survives the journey.

Best practices

Carry a durable asset ID and metadata first.

Validate agent answers against a standard report.

Use read-only tools where analysis is the goal.
