

The 7-phase rollout

Sequence matters more than speed.

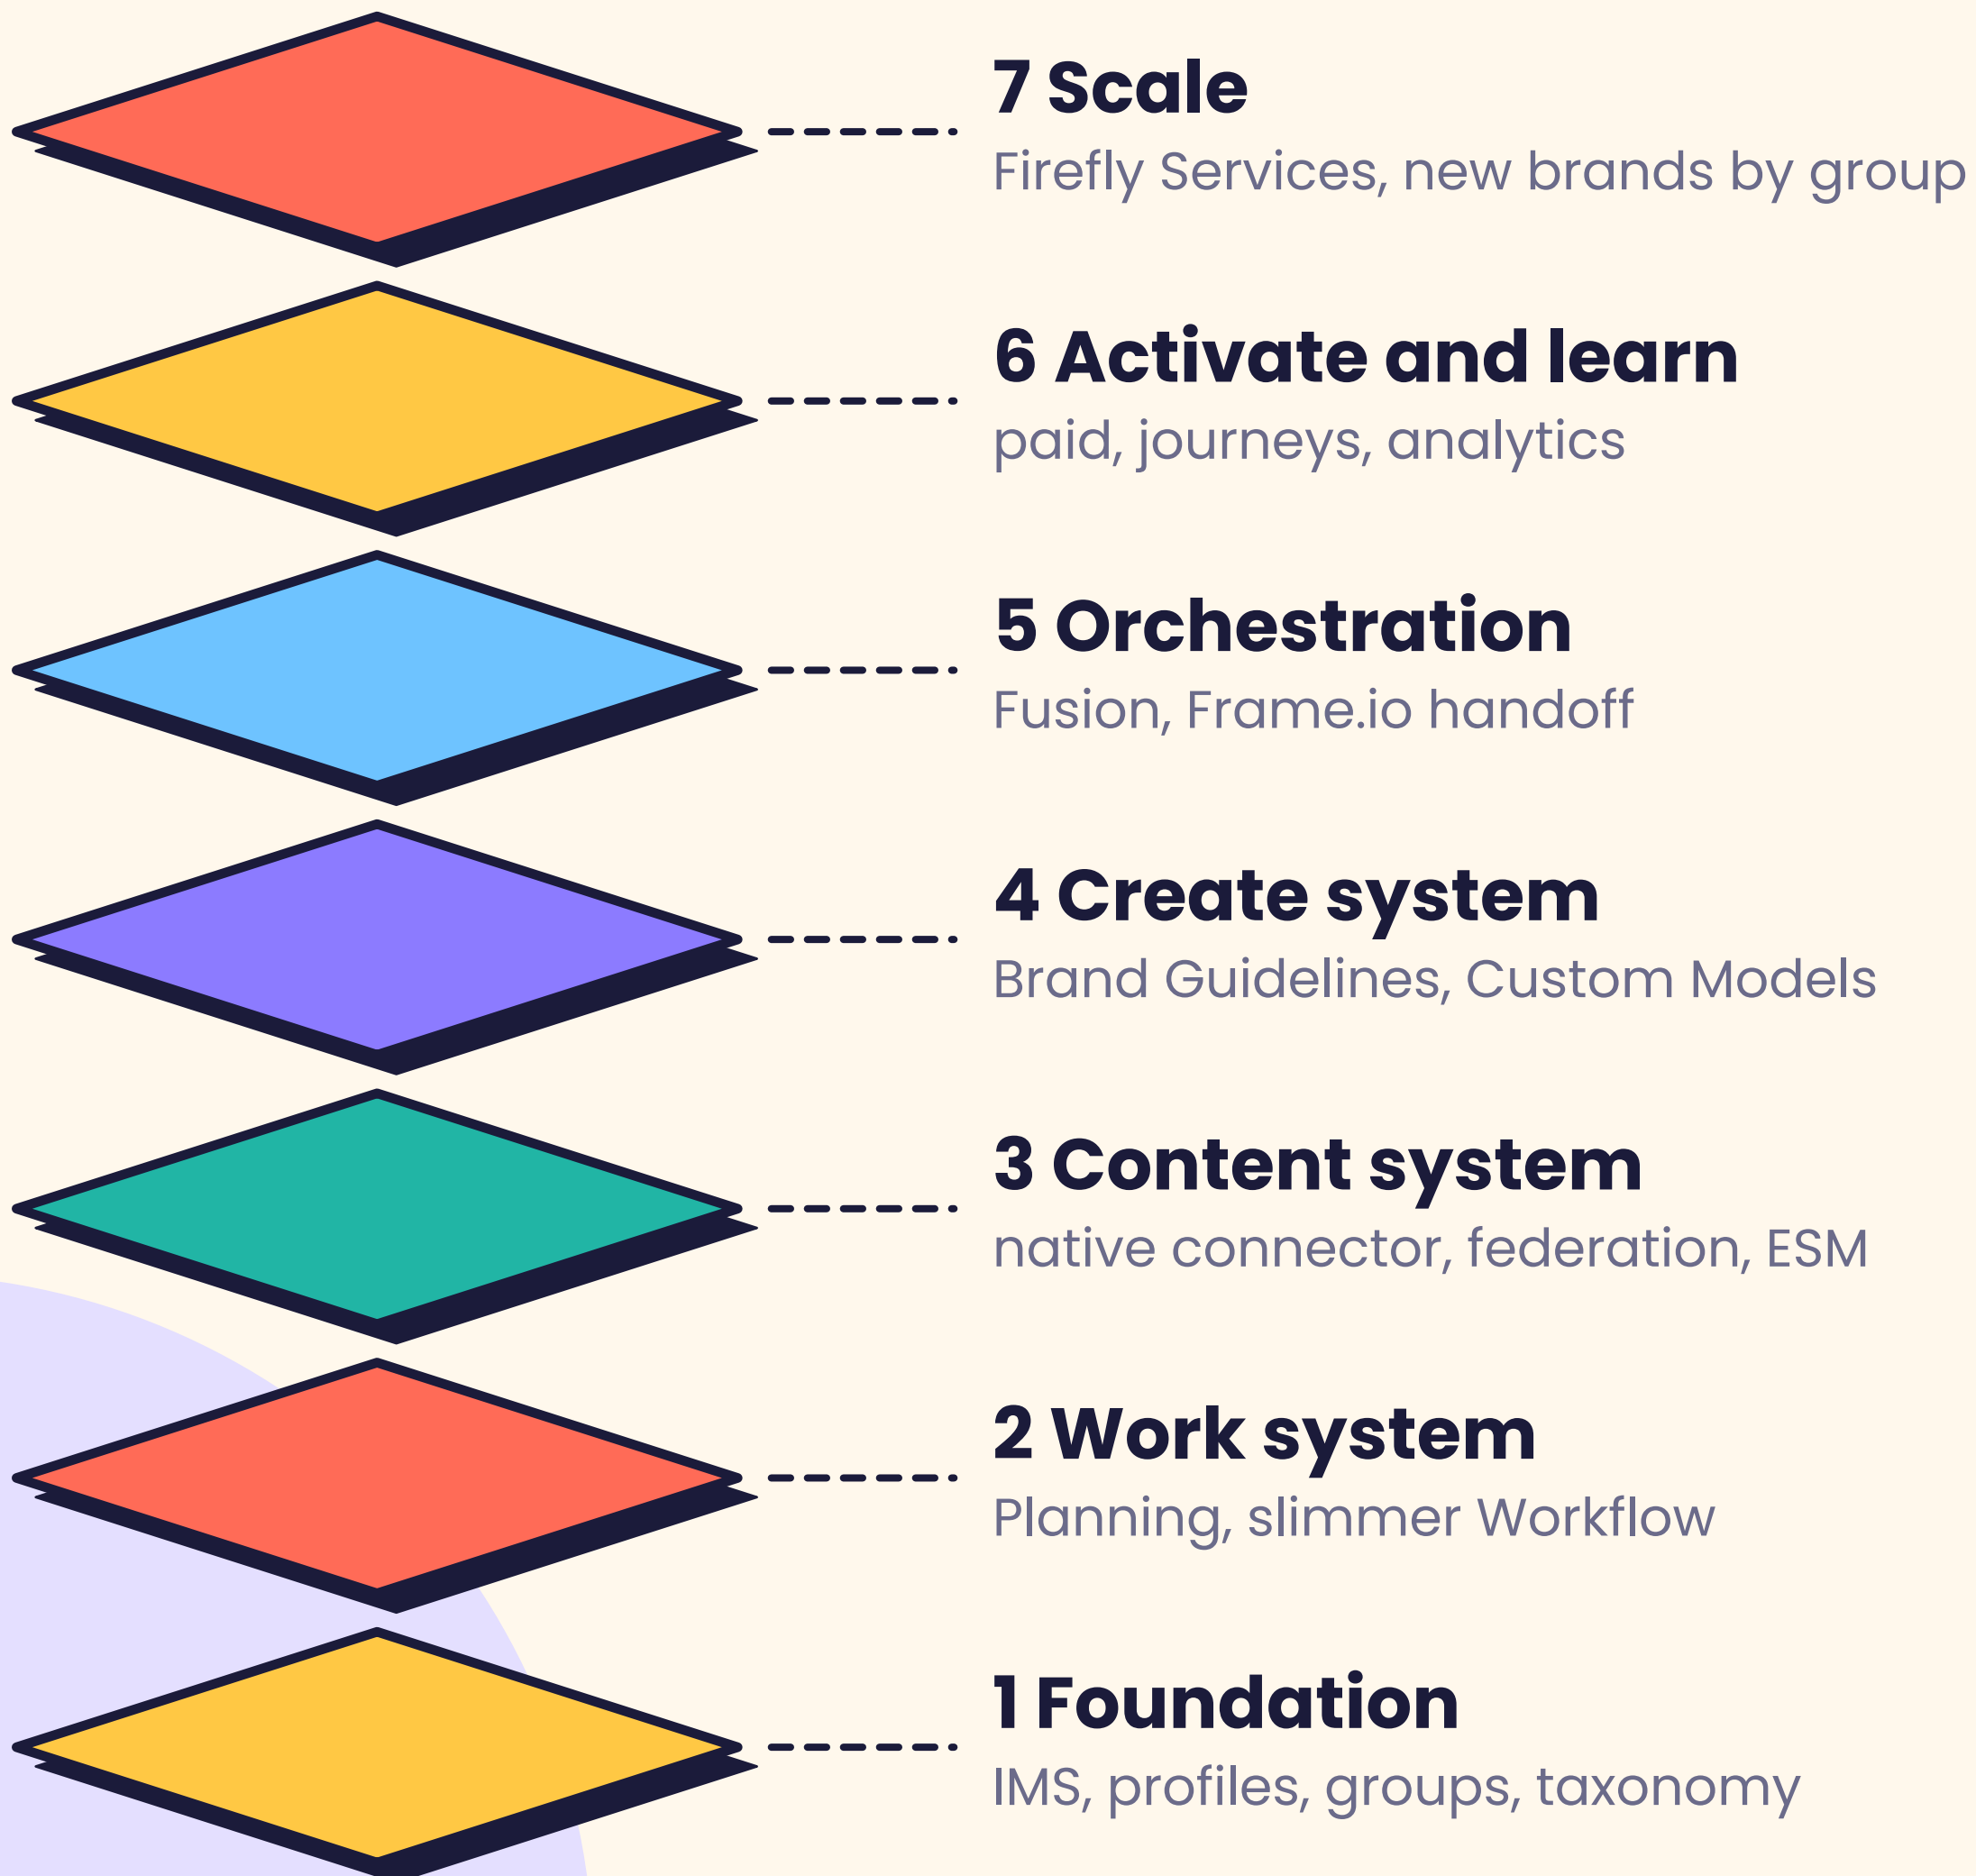

7 phases

taxonomy and identity before volume

1 Seven phases, in order

Scale last, not first.

2 Five acceptance tests

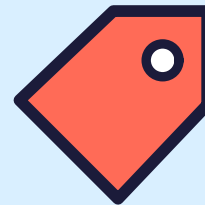

Is the implementation healthy?

Access

a new user sees nothing until a profile

test 1

Metadata

typed once in Planning, seen in Workflow

test 2

Storage

WIP in ESM, approved in AEM

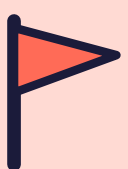

test 3

Approval

Frame.io updates Workfront and AEM

test 4

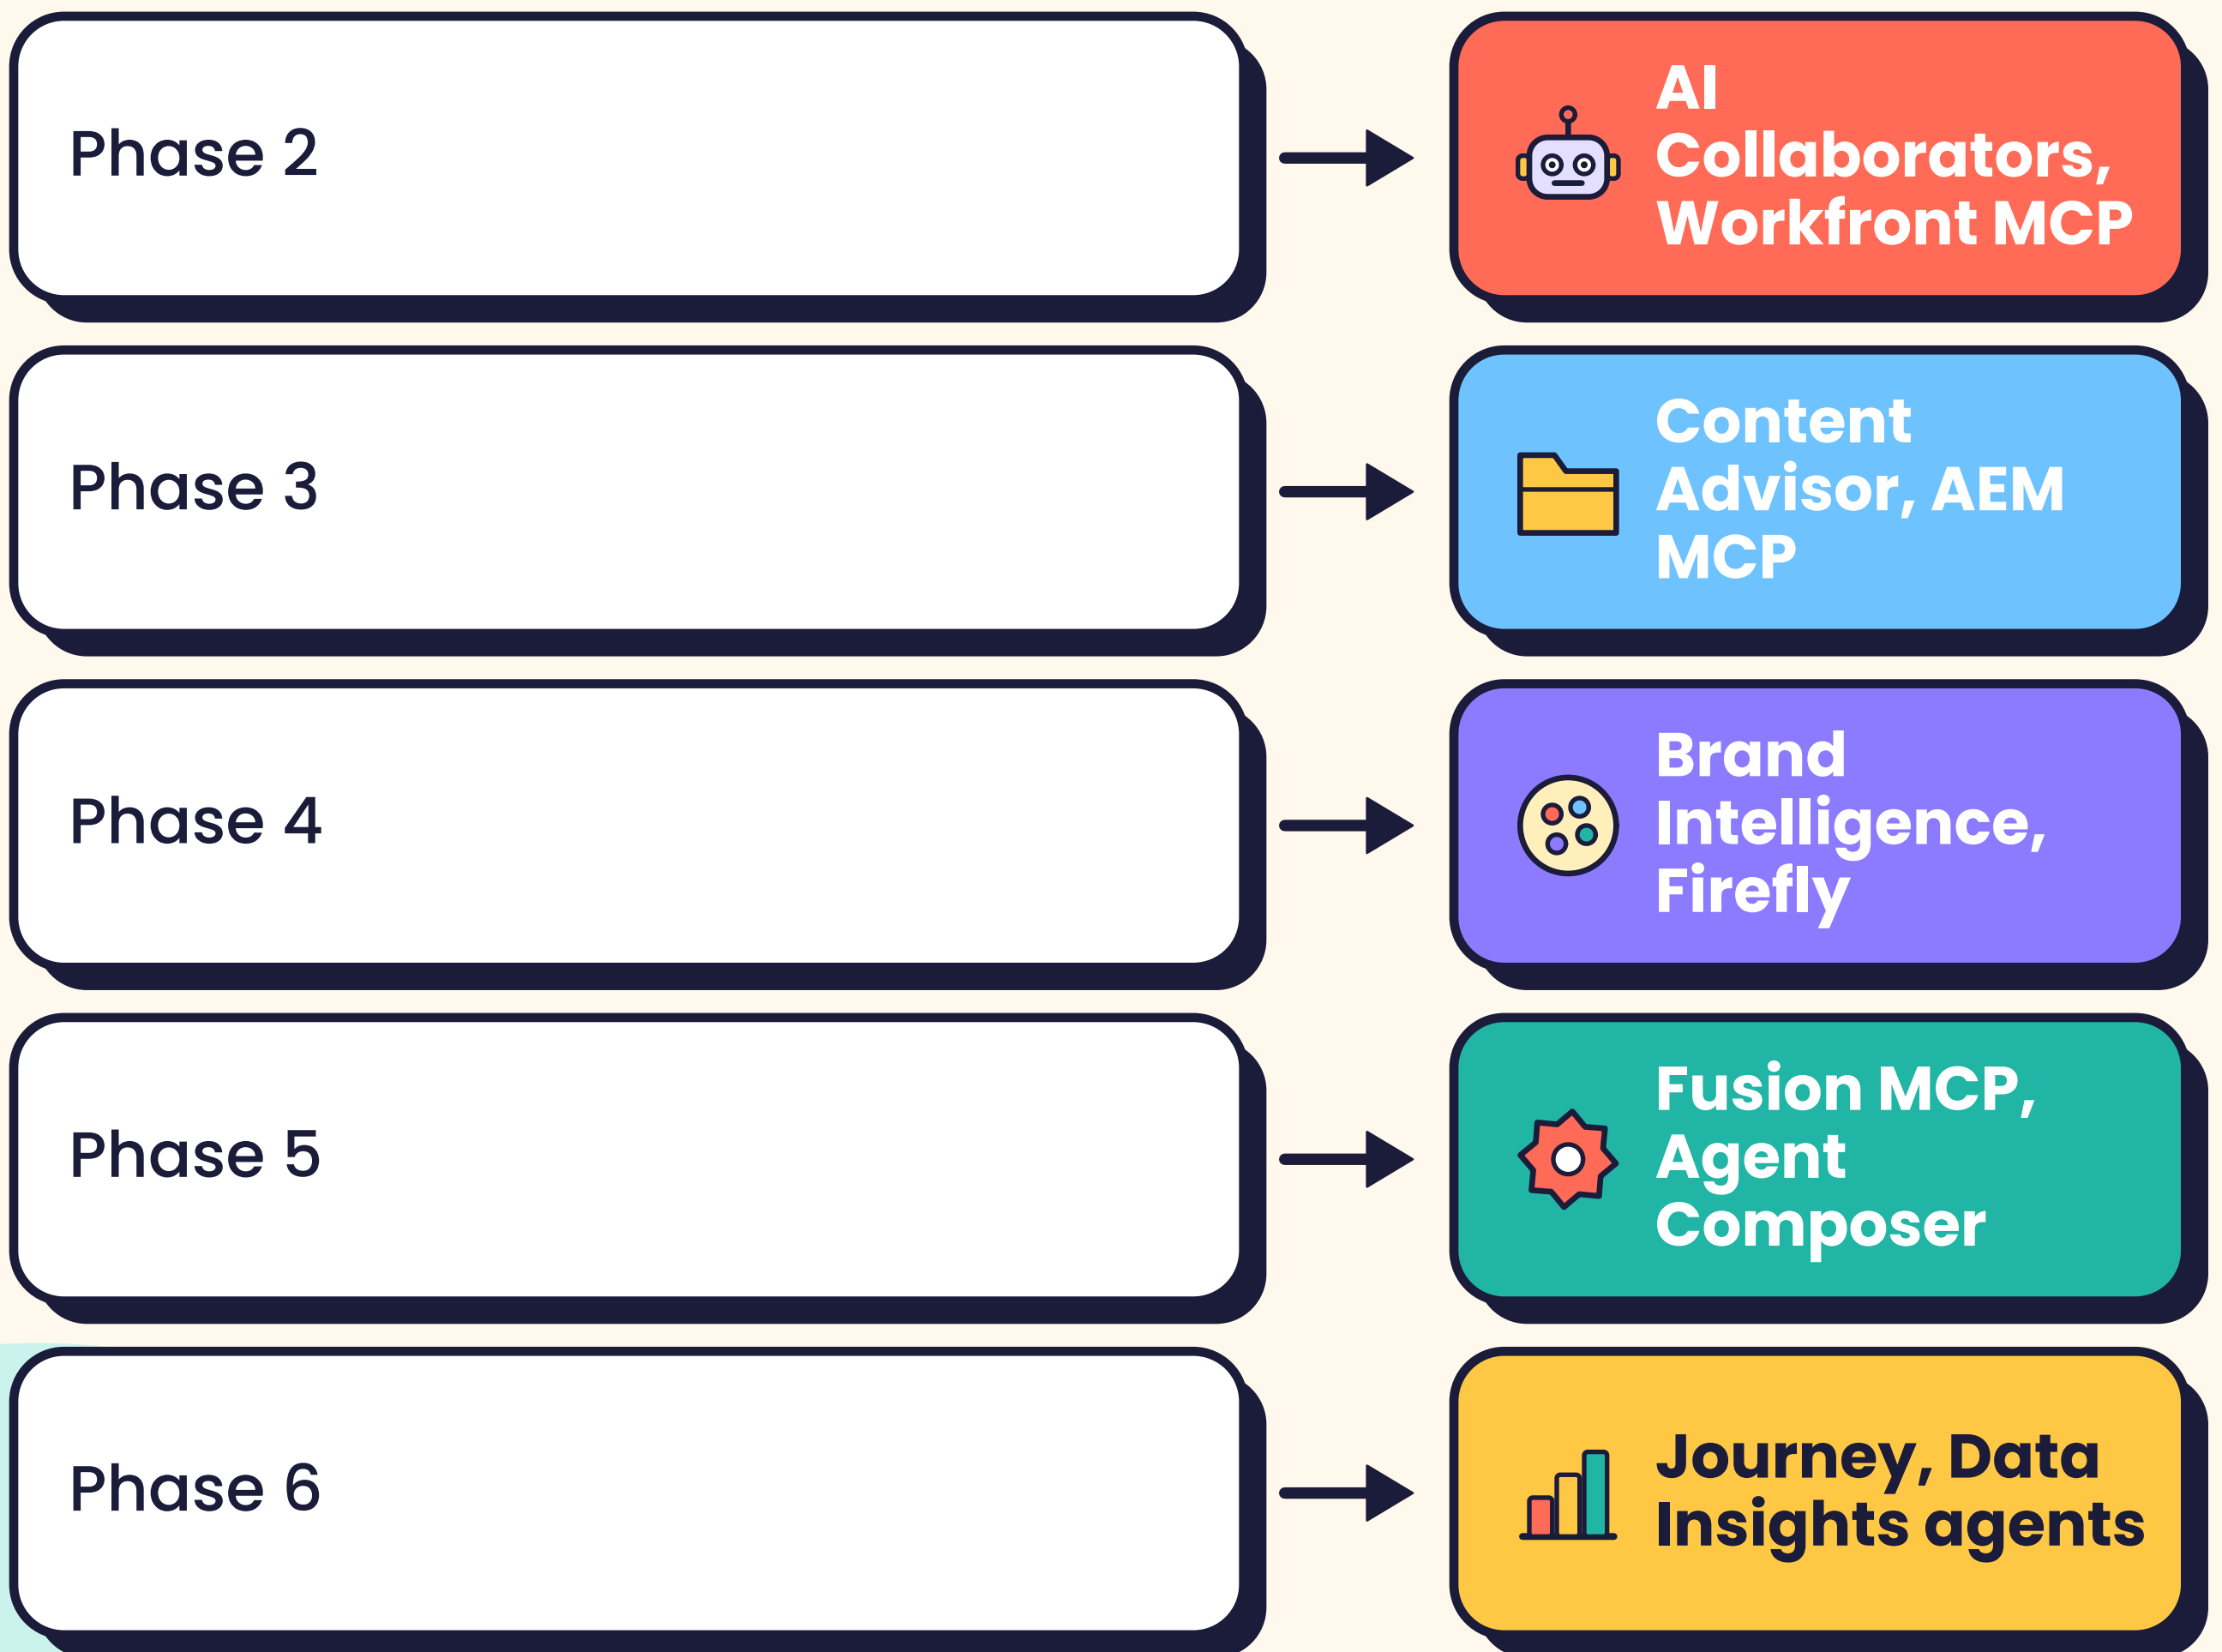

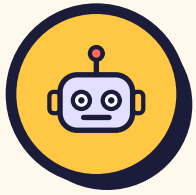

Test 5

A GenStudio-only team isn't reported as 'transformation complete.'

3 Agents, in rollout order

Adopt them with the phase, not before.

Agentic angle

Adopt agents in rollout order. Identity and taxonomy first, then work, content, create, orchestration and activation.

ADOBE TOOLS TO KNOW

Phase 2: AI Collaborators, Workfront MCP

GA (PRESS)

Phase 3: Content Advisor, AEM MCP

DOCUMENTED

Phase 5: Fusion MCP, Agent Composer

VERIFY

Phase 6: Journey, Data Insights

DOCUMENTED

Status as of Sept 2026. Confirm in your own tenant.

Sources on slide 7

Best practices

Test: agent sees only what the user's profile allows.

Test: agent-created records use controlled values.

Require human approval before assets land in AEM.

Confirm licensing, AI credits and region per phase.

ADOBE DOCS

Untagged items are design advice.
