

BONUS

Content Supply Chain for developers

FOR DEVELOPERS

You don't have to go all-in on Adobe

Keep your masters. Connect the rest.

keep your stack

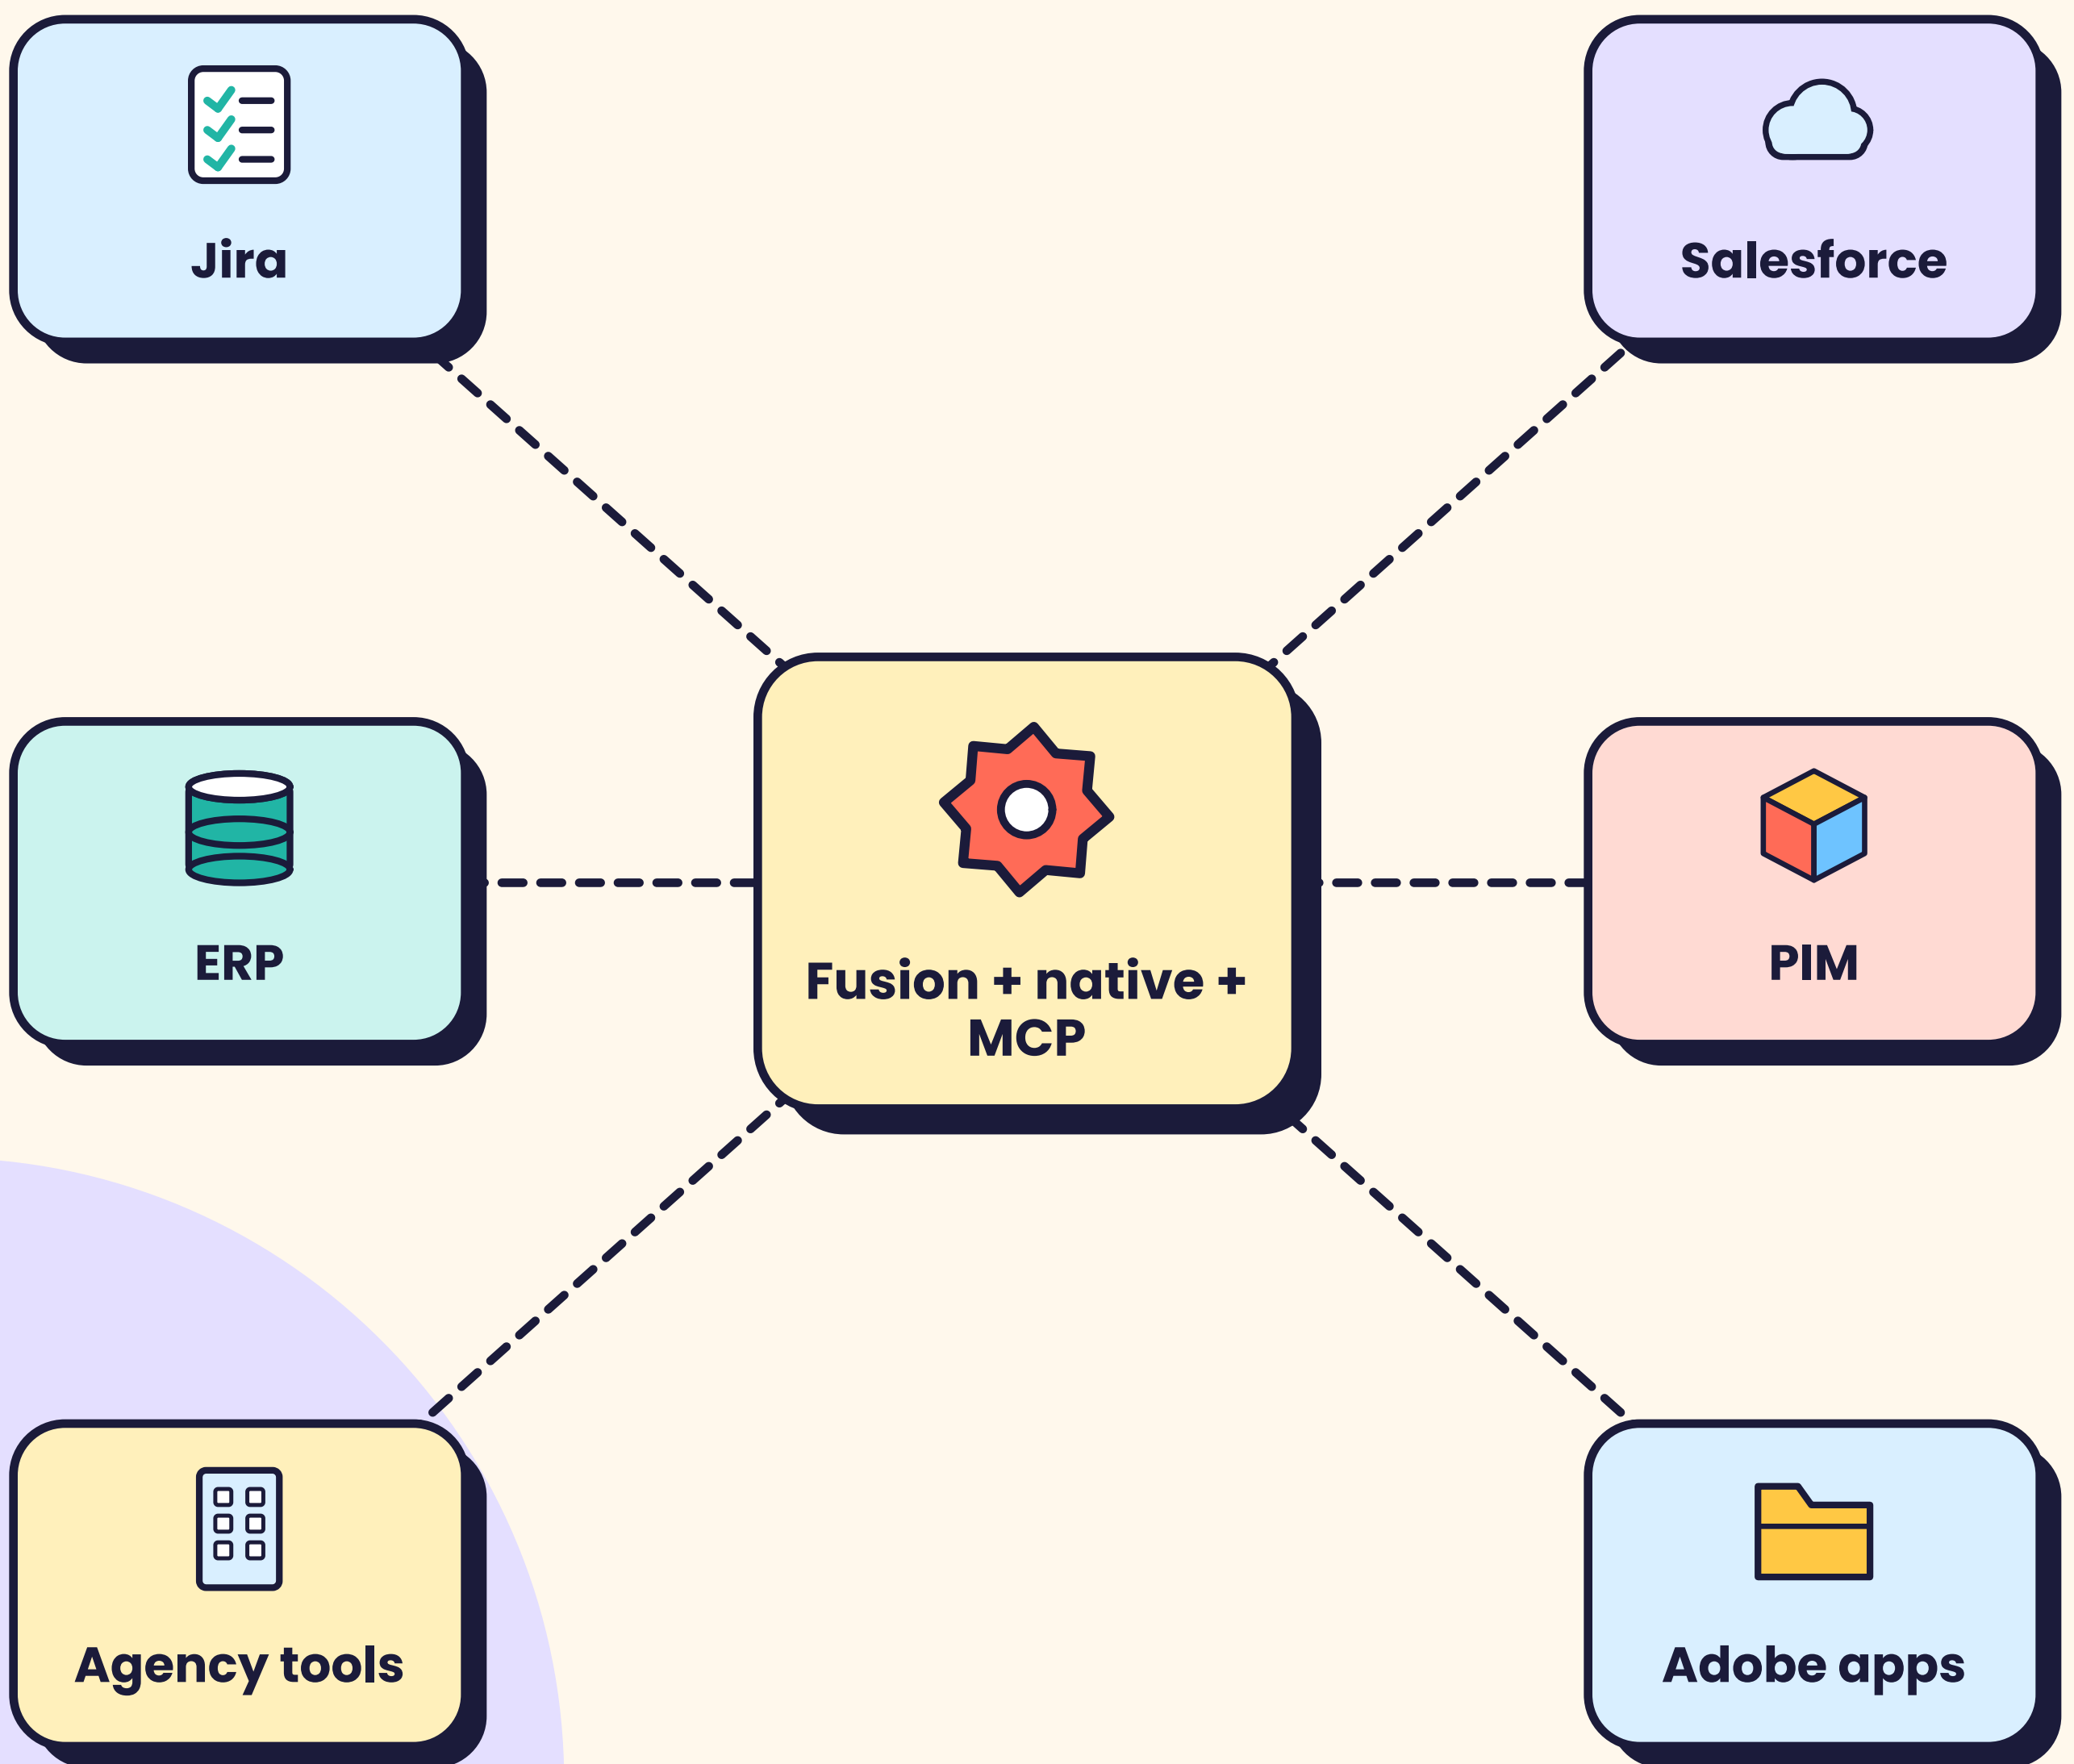

no new source of truth

Sources on slide 7

1 Keep your masters, connect the rest

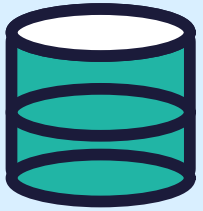

Fusion in the middle.

2

Who keeps what

Masters stay where they are.

ERP and PIM

product data master

source of truth

Jira

engineering status

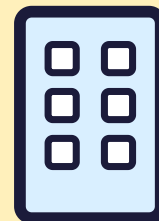

stays

Salesforce

CRM data

stays

Agencies

their own tools

connected

3

Agents can still connect

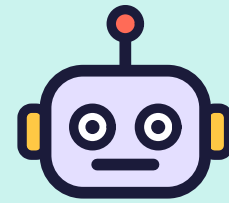

MCP is an open standard.

MCP clients

Claude, ChatGPT,
Cursor, Copilot Studio

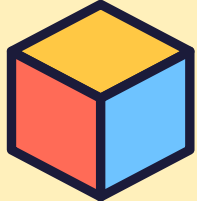

open standard

AI Collaborators

call outside agents via
MCP, API, A2A

Workfront

Agent Composer

bring your own agent

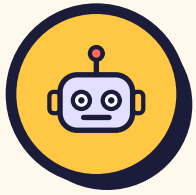

verify GA scope

Data loss prevention

Copilot Studio uses
Power Platform policies

check DLP

Agentic angle

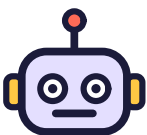

MCP is open, so Claude, ChatGPT, Cursor and Copilot Studio can connect. Keeping your stack doesn't lock you out of agents.

ADOBE TOOLS TO KNOW

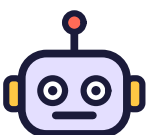

Adobe MCP servers (open standard)

DOCUMENTED

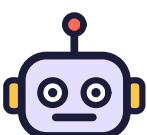

AI Collaborators call external agents

GA (PRESS)

Agent Composer (BYO agent)

VERIFY

Marketing Agent for M365 Copilot

DOCUMENTED

Best practices

Keep your masters; connect agents through governed gateways.

Authenticate through IMS and rely on org permissions.

ADOBE DOCS

Register non-Adobe agents where they can be governed.

Check DLP: Copilot Studio goes through Power Platform policies.

ADOBE DOCS

Untagged items are design advice.
